

"As in the earlier work, "Surely You're Joking, Mr. Feynman", Leighton's invisible hand brings Feynman to life in all his wonderful and multiple dimensions. Marvelous."

- Kirkus Reviews

The late physicist Feynman gives us another healthy dose of his irreverent zest for life. He tells of his father, who taught him to think, and of his first wife Arlene, who taught him to love, even as she lay dying. In the second, longest part of the book, Feynman takes us behind the scenes of the Presidential Commission investigating the space shuttle Challenger's explosion in January 1986. Through the eyes of a great scientist, we see the confusion and misjudgment that have plagued NASA in recent years. We relive the moment when the cause of the Challenger disaster was revealed to the world through a simple and elegant experiment, as Feynman dropped a ring of rubber into a glass of cold water and pulled it out, misshapen. Only once in a great while does a scientist/adventurer like Richard Feynman pass by. Even more rarely is there a record in his own words, as told to his long-time friend Ralph Leighton, such as the record Feynman leaves here, of the wonders that abounded in his life. As Richard Feynman says in these pages, "I'm always looking, like a child, for the wonders I know I'm going to find, not every time, but every once in a while." - from the publisher Science Neus Rooks

Norton, 1988, 255 pages, 8½" x 5½", hardcover, \$17.95 ISBN 0-393-02659-0

Games and Exercises to Flex Your Mind By Tom Wujec

Does your mind wander when you think through a problem at home or at work? Do you have trouble remembering vital names, dates, facts? Instead of making creative leaps, are you all too often confronted with mental blocks?

It may be that your mind is suffering from lack of exercise. Wujec shows you how to strengthen, flex, tone and coordinate your "mental muscles," conditioning the brain just as you do the body. Perfect for the student, business person or anyone who feels their mind has grown "flabby," this fully illustrated guide provides dozens of easy exercises designed to:

- increase attention span
- improve memory
- enhance creativity
- stretch imagination
- build up powers of deduction and analysis
- hone decision-making skills

It also explains many invaluable techniques for relaxation, visualization, verbalization and learning. Packed with intriguing puzzles, provocative ideas and suggestions, this book can help you develop your very own mental fitness program — and gain the ultimate competitive edge in business, school or recreation.

- from the publisher

Attracting Birds to Your Backyard The best-known man of birding, Roger Tory Peterson, tells how to lure birds by providing for their three basic needs (food, water and cover). He also suggests some good books, but then, books don't show birds or Dr. Peterson in living, moving color and sound. 60 minutes, \$29.95

Hummingbirds Up Close Your guide to attracting, identifying and enjoying all 13 species of hummingbirds that breed north of the Rio Grande. You'll see amazing new footage of male hummingbirds sizzling through their courtship flights, females building their delicate nests and feeding their young and slow motion sequences of hummingbirds capturing insects in midair. Best of all, this cassette shows you how to bring the hummingbirds to your garden with flowers and feeders. 55 minutes, \$29.95

Wild Alaska shows Alaskan mammals in the wild and their struggle for survival. From the Alpine tundra in the shadow of Mt. McKinley to the broad expanse of the North Slope, Wild Alaska beautifully portrays winter's icy lock to summer's abundant growth. The camera follows migrating caribou, captures the nearly extinct musk ox and a rare, dramatic life and death struggle between a caribou and a grizzly. This video is a timeless scenario of the vital role each creature plays in nature's continuous chain of evolution. 60 minutes, \$29.95

Wild Australia traces the history of Australia's unusual mammals rarely seen in their natural habitat, even by Australians. John Shaw, Australian cinematographer, captures close-ups that are startling and revealing. There are myths about koalas, i.e., they don't drink, they move slowly, and they are bears. Facts about these cuddly marsupials will surprise you. Have you seen a platypus? An echidna? Or a numbat? You'll see them and the real crocodiles of Crocodile Dundee in action! Included is rare footage of the Tasmanian tiger, which was shot out of existence, and the story of the wild camels of the Australian Outback, and where they're exported. 60 minutes, \$29.95

All tapes available in VHS format only.
