## Discrimination by DNA

# The Beauty of Light

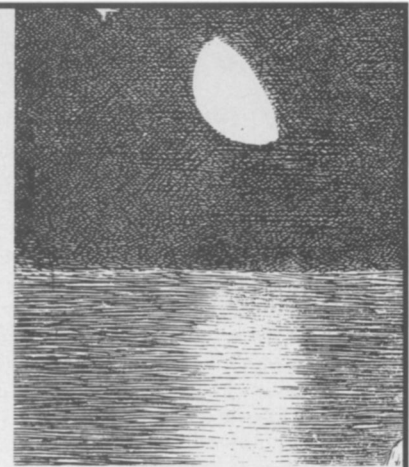

By Ben Bova

- Discover why sight is the most important of our five senses; learn how our eyes and brain function.
- Peer through microscopes and marvel at modern-day medicine, from laser surgery to light therapy.
- Follow the action in photography, movies, rock concerts and holography.
- Meet Archimedes, Galileo, Isaac Newton, Albert Einstein and Thomas Edison— inventors who stunned the world with their scientific discoveries.

*The power and beauty of light are fundamental to human's existence. From cavemen days to high-speed freeways, our sharp-focusing eyes have helped us to survive and succeed. We are able to appreciate the incredible beauties of the world— Yosemite National Park, the Sistine Chapel and a glowing sunset.*

*In The Beauty of Light, Bova takes the reader on a striking journey in words and pictures from the creation of earth and the earliest forms of life to the exciting possibilities for the future and the far reaches of the universe—from the Big Bang to the Big Dipper, star gazing to sunbathing, the distant past to the foggy future.*

## SCIENCE for KIDS!

**SCIENCE KIT-OF-THE-MONTH PROGRAM** unlocks secrets of biology, chemistry, physics, and mathematics! Every month, a new science kit is sent to members with safe, simple materials and instructions for dozens of exciting experiments.

**THINGS OF SCIENCE** has been fascinating bright and curious 9- to 14-year-olds with science learning and fun since 1940. Kids, parents, teachers love it! Satisfaction guaranteed.

Start a gift membership for your child, grandchild, or other young friend today! Send your name and address, the name and address of your young "scientist" (we'll also send a gift card), and a check/money order for \$24 for a one-year, 12-kit membership. Or write for information:

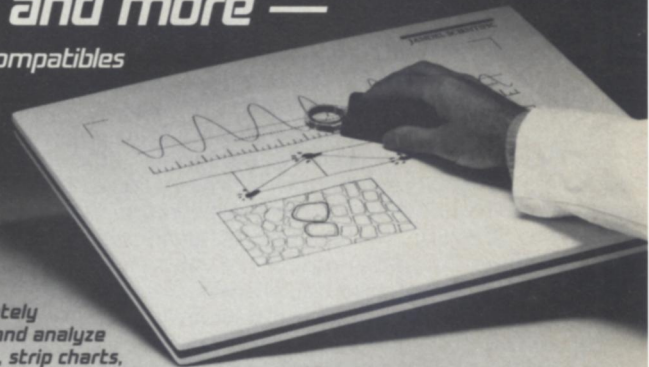

**PERFECT GIFT**

**THINGS OF SCIENCE**, Dept. 202-B

# SigmaScan™

measures areas, lengths  
coordinates, angles,  
slopes, and more —

IBM PC and Compatibles

Quickly and accurately digitize, measure and analyze photomicrographs, strip charts, X-rays, maps, and more — using your own PC.

- Areas, lengths, angles, and slopes
- X,Y digitizing
- User-defined units
- Standard ASCII data output (use in Lotus, dBase, etc.)
- Keyboard macros
- User-defined data transforms

Save hundreds of hours annually over manual measurement techniques. Automate complex analyses. Comes complete with software, choice of digitizing tablet, money-back guarantee and full year hardware warranty.

Sigma-Scan™ software is also available separately.
