

"... if time is really just another kind of space, why can't humans move back and forth in time as easily as they move around in space? ... Is there a time machine in your future?" Thus begins Herbert's exploration into the realm of theoretical loopholes in physics, where the seemingly impossible — faster-than-light motion — might be possible after all.

Both those who are fascinated by science fact and those who are avid followers of science fiction will be intrigued by his brand of visionary physics. He points out that it was once believed that it would be impossible to break the sound barrier—until test pilot Chuck Yeager did so. He now discusses the complex ideas that may alter the perception that nothing in the universe can exceed the speed of light. If this is true, states Herbert, then time travel, computers that answer questions before they are asked and ships that can cruise the stars are all within the realm of possibility.

— from the publisher

"Free of the woolgathering that tints much writing on the 'new physics', this brave, exciting book should send scientists back to their drawing boards; for the nonspecialist reader, it reveals a world much stranger than *Star Trek*."

The Psychology Of Everyday Things

Even the smartest among us can feel inept as we fail to figure out which light switch or oven burner to turn on, or whether to push, pull or slide a door. The fault, argues this book, lies not in ourselves, but in product design that ignores the needs of users and the principles of cognitive psychology. The problems range from ambiguous and hidden controls to arbitrary relationships between controls and functions, coupled with a lack of feedback or other assistance and unreasonable demands on memorization. The book presents the VCR, computer and office telephone, all as models of how not to design for people. But good, usable design is possible. The rules are simple: Make things visible, exploit natural relationships that couple function and control and make intelligent use of constraints.

RB1030

"By recounting scads of devastating and often hilarious anecdotes about how people and devices can go wrong, he pinpoints mental mechanisms and psychological concepts that have gone unnoticed for far too long by the people who design our doors, faucets, typewriters, refrigerators, cars, computers, airplanes, power plants, and on and on. If taken seriously by designers and engineers, this charming and utterly commonsensical little book has the potential to profoundly improve the everyday human environment—and I hope it will." — **Douglas R. Hofstadter**, author of *Gödel, Escher, Bach* and *Metamagical Themas*

"A boon for thing watchers, people like me who are forever looking for new ways to see and think about the everyday world." — **Seymour Papert**, Professor of Media Technology, MIT

The quick and easy way to learn a foreign language!

Based on the U.S. Military "Speed-up" Method of Language Learning

Programmed for Rapid Learning!

It's been scientifically proven that we remember words we *hear* better than words we see. That's why you'll find the two audiocassettes in each Language / 30 package more useful than all the language books money can buy. Just start listening to the tapes, repeat the foreign phrases a few times and, believe it or not, you'll begin speaking like a native. It's that simple!

Remember, Language / 30 is a learning tool that works. It incorporates the "speed-up" method of language learning—the same method used to train U.S. government personnel who work overseas.

With Language/30, you can practice your target language anytime, anywhere. You won't have to set aside hours just for language study. You can listen to Language / 30 while you're getting dressed, eating, driving to work, or even jogging. Whether you're studying French, Russian, Swahili, or any of the other 28 languages listed below, you'll improve your speaking fluency and listening comprehension *each time* you play the Language/30 tapes.

Speak with the Ease of a Native

Each Language/30 program features native voices speaking the most important and commonly used conversational phrases. You'll learn all the words you need to know for greetings, introductions, requests, and general conversations in hotels, restaurants, stores, theaters, and other places. And world-renowned linguist Charles Berlitz, explains the social customs and etiquette of the country.

So, whether you're going abroad for a short trip or an extended stay, you'll find that the fluency you've gained from Language/30 will make your visit easier, more pleasant, and more enriching. Instead of being a "stranger in a strange land," you'll be able to converse freely with the natives in their own language.

Each program comes with two 45-minute cassettes and a convenient phrase dictionary in a compact, 6" x 7" water-proof vinyl case.
