# STACKABLE BEECHWOOD BOOKSHELVES—AT A PRICE YOU'D EXPECT TO PAY FOR PLASTIC!

**THAT'S RIGHT! NATURAL WOOD FURNITURE AT AN AFFORDABLE PRICE.**

**ONLY \$39.95 EACH**  
LIST PRICE \$59.95

**A Beautiful Complement to Any Decor.**

This quality shelving system is made of natural European beechwood—a hardwood tough enough to be used for flooring and beautiful enough to be used for fine furniture.

STACK-A-SHELF has a place in every room, whether it's to show off your library or just to organize unsightly clutter. The STACK-A-SHELF system is perfect for showcasing your personal treasures. Everything from vases to pictures can be proudly displayed on these good-looking, versatile and, above all, affordable units.

### Stack Them... They're Interlocking

Each free-standing unit measures 27<sup>3</sup>/<sub>4</sub>" wide × 11" deep × 37" high, and is designed to interlock and stack. This means you can actually create your own wall unit. And if you move, just fold them down and take them with you.

And natural beechwood is attractive... even unfinished. So the unit can be used immediately or you can paint, stain or varnish your STACK-A-SHELF to match your own decorating needs.

### Sets Up In Seconds... Without Tools!

No tools, screws or glue required. Just take the unit out of its flat carton, fold the sides out, and the shelves practically fall into place.

Nothing could be easier. And, for a limited time, Barnes & Noble is offering all of our STACK-A-SHELF units at a savings of 33% off the retail price. So don't pile—decorate in style, with affordable beechwood shelving from Barnes & Noble.

**Global Warming** examines the causes of worldwide climate change — the “greenhouse effect” — that may raise world temperatures by ten degrees F in less than 100 years. Schneider, whom Paul Ehrlich calls “one of the world’s most illustrious climatologists,” describes the likely consequences — from agricultural losses and changes in sea level to public health issues and social upheaval — and addresses the most important and urgent question that anyone concerned with the fate of our planet must confront: “What can or should be done about the greenhouse effect?”  
— *from the publisher*

“*Global Warming* may be the ultimate insider’s guide to the greenhouse effect. One of the nation’s foremost climate experts provides not only a compelling assessment of the scientific prospects, but also a revealing backstage look at the recent politics of one of the central issues facing our planet.”  
— James Gleick, author of *Chaos*

**The End of Nature** by Bill McKibben.

Writes eloquently of the meaning of changes that already exist — about the sadness of a world where there is no escaping human influence. Although for decades civilization has pillaged and polluted the earth, in the past those attacks were relatively localized; now, with the global changes caused by greenhouse gases and ozone erosion, man has altered the most elemental processes of life everywhere, and the outdoors — nature itself — has been turned into the equivalent of an enormous heated room. The basic forces of nature, once beyond man’s reach, will forevermore be subjects of man’s dominion.

— *from the publisher*

“This elegantly-written near-elegy to nature will be a touchstone for any future discussion on the fate of the Earth.”  
— LIBRARY JOURNAL

**Global Warming:** Sierra Club, 1989, 317 pages, 9¼” x 6”, hardcover, \$18.95

**The End of Nature:** Random, 1989, 226 pages, 9½” x 6¼”, hardcover, \$19.95

# IT'S HERE.

**Introducing SigmaPlot™ 4.0.**

The powerful new version of the world’s finest PC software for the production of publication-quality scientific charts and graphs...on your own IBM® or compatible personal computer.

**Used by over 15,000 scientists.**

SigmaPlot, Version 3.1, is the software of choice worldwide for creating graphics for scientific papers and poster sessions. It was selected “Editor’s Choice” by *PC Magazine* for its outstanding output. Now, Jandel’s new SigmaPlot Version 4.0 gives you all of the advantages of 3.1...and much, much more.

**Designed with the scientist in mind.**

- Easy-to-use pull-down menu interface
- Direct data input from Lotus 123® and ASCII files
- Automatic error-bars, confidence intervals and quality-control lines
- Wide range of specialized scales and graphs
- Outstanding page layout control
- Sophisticated non-linear curve fitting
- Full mathematical transform language
- Huge data worksheet
- Export graphs into WordPerfect® 5.0, Pagemaker®, Ventura Publisher® and others
- Extremely high-quality output

**Affordable and fully supported.**

Priced under \$500, SigmaPlot 4.0 is well within reach of any research facility. And, like all Jandel products, SigmaPlot 4.0 comes with a money-back guarantee and the full technical support of Jandel’s experts. Call today for a FREE brochure: **1-800-874-1888** (inside CA 415-924-8640).
