IT LIGHTS UP IN THE DARK!

Barnes and Noble Proudly Presents MERCURY—A World Class Illuminated Globe.

A globe is like an encyclopedia or Bible—no educated home is complete without one. Maps are all very well and good, but only the *three-*

Includes 25-watt bulb, 6 ft. cord. All parts UL listed.

dimensionality of a globe can accurately represent the shape and proportions of our planet—it's a "hands-on" geographical learning aid the whole family can use.

And now your family can enjoy discovering a *new world* with the Mercury Illuminated Globe—an impeccably detailed, 18" tall model of our planet made in Italy by Nova Rico, the premier globe-makers of Europe.

Two Globes in One

Exquisitely designed and perfectly executed, the Mercury is actually two globes in one! Before you switch it on, it offers a comprehensive view of the earth's physical surface, including its topography, elevations, vegetation patterns, ocean currents plus latitude, longitude and international date lines as well as 3,600 place names—everything from the tallest peaks to the tiniest islands!

As if all that weren't enough, switch the Mercury on, and its illuminated surface takes on an entirely new dimension. Here you will see the political world—the most current national boundaries and international borders—revealed in 8 brilliant colors! Clearly, no conventional globe can match the unique, exciting appeal of the Mercury.
