Books is an editorial service for readers' information. To order any book listed or any U.S. book in print, please remit retail price, plus \$2.00 postage and handling charge for each book, to **SCIENCE NEWS BOOKS**, 1719 N Street, NW, Washington, DC 20036. All books sent postpaid. Domestic orders only. Please allow 4-6 weeks for delivery.

Cold Fusion: The Making of a Scientific Controversy — F. David Peat. Guides the general reader through the cold fusion debate, starting with the March 1989 announcement of controlled nuclear fusion in a laboratory setting and proceeding through the denouncements of that claim to some ongoing experiments that continue to yield unexplained results. Peat, the author of *Superstrings and the Search for the Theory of Everything*, explains the process of cold fusion and its possible implications for meeting future energy needs. Originally published in hardcover in 1989. Contemporary, 1990, 188 p., illus., paperback, \$8.95.

Creatures, Corals, and Colors — David L. Bull and Ann Scarborough-Bull. A celebration of the seafloor's colorful pageantry, from the chilly kelp forests off the southern California coast to the psychedelic coral gardens of the Caribbean. The text, spectacularly illustrated with more than 150 color photographs, explores the natural history of unique underwater habitats, introducing the general reader to the creatures of the deep and examining their mysterious coexistence. Audubon Pk Pr, 1990, 132 p., color illus., hardcover, \$35.95.

The Discovery of the Bismarck — Robert D. Ballard. It took two years and a painstaking sonar survey of 100 square miles of seafloor before Ballard and his crew located the *Bismarck*, Hitler's greatest battleship. This gripping account of the *Bismarck's* maiden journey, her sinking, Ballard's search, her discovery and her exploration is generously illustrated with historical and underwater photographs as well as artists' renderings. Warner Bks, 1990, 231 p., color/b&w illus., hardcover, \$35.00.

The First Weeks of Life — Miriam Stoppard. This comprehensive guide begins by familiarizing mothers with their newborn's appearance and behavior and continues through care and feeding in the hospital and at home. Chapters are extensively illustrated with photographs and diagrams, providing fundamental information such as how to clean and change newborns and how to warm bottles or remove a nursing baby from the breast. Includes a chapter on women's postpartum changes, both physical and emotional. Originally published in Great Britain in 1989. Ballantine, 1990, 160 p., color/b&w illus., hardcover, \$17.95.

Lonely Hearts of the Cosmos: The Story of the Scientific Quest for the Secret of the Universe — Dennis Overbye. A history of cosmology — the scientific effort to determine the origin and fate of the universe — and an introduction to cosmologists who have probed phenomena ranging from black holes to an expanding universe. Writing for the general reader, Overbye conveys the inspiration, excitement and frustration of this cosmic quest. HarperCollins, 1990, 438 p., hardcover, \$25.00.

Overcoming Bladder Disorders: Compassionate, Authoritative Medical and Self-Help Solutions for Incontinence, Cystitis, Interstitial Cystitis, Prostate Problems and Bladder Cancer — Rebecca Chalker and Kristene E. Whitmore. A guide to the diagnosis, treatment and prevention of the most common bladder problems. Includes an index of diagnostic tests and a glossary of drug treatments. Har-Row, 1990, 338 p., illus., hardcover, \$19.95.

The Second Fifty Years: Promoting Health and Preventing Disability — Robert L. Berg and Joseph S. Cassells, Eds. This report, compiled by the Institute of Medicine, examines 13 health threats to the elderly and offers policy and research recommendations to improve the quality of life and health care for the aging U.S. population. Extensively referenced chapters address, among other threats, poor nutrition, osteoporosis, depression, physical inactivity and sensory loss. Natl Acad Pr, 1990, 332 p., charts, hardcover, \$29.95.

What Light Through Yonder Window Breaks? More Experiments in Atmospheric Physics — Craig F. Bohren. In this sequel to *Clouds in a Glass of Beer*, Bohren continues to explore the world of atmospheric physics, explaining such everyday phenomena as highway mirages and winter frost on the *inside* of windows. Written for science enthusiasts interested in the physics of everyday life, the book reflects both the curiosity and the skepticism with which scientists approach the world. Wiley, 1991, 190 p., illus., paperback, \$12.95.

Sorting out fact from fiction and myth from reality in schizophrenia is no easy task. In *Schizophrenia Genesis*, one of the world's leading experts presents an absorbing account of what is actually known about the subject.

Irving I. Gottesman draws on the latest genetic and environmental research, and on recent findings from neurobiology, to investigate the origins of schizophrenia. He argues that the disorder can be understood only by considering both the genetic evidence and the familial and societal pressures associated with schizophrenia's onset and course. Included are discussions of the diagnostic controversies that have swirled around schizophrenia, genetic counseling and social policies affecting all those touched by the disorder.

— from the publisher

"For anyone who has ever had an interest in understanding schizophrenia [this book] is the definitive source book. It is a clearly written book that is, nevertheless, so packed with information about all aspects of schizophrenia, including first-person accounts by patients and their families, that readers will find themselves going back again and again to absorb the full fare that is offered."

— L. Erlenmeyer-Kimling
