

A Slice of Forest

This collection of picture puzzles is an in-depth study of the Amazon Rainforest — the largest area of tropical forest in the world and one of the most important “green lungs” of our planet.

The slice through this verdant forest exposes many creatures known to exist. How many more are there waiting to be discovered? It also shows the wild beauty of the region, so expertly captured by Mary Elliot-Lacey. Assembly of the four puzzles will reveal the complete picture, but each image is a spectacular portrait of a world unto itself.

\$21.95 each, or the set of 4 for \$79.95

Puzzles shown (from the top):

RF4: Life On and Above the Forest Canopy

RF3: Amid Verdant Forest Splendor

RF2: The Forest Floor

RF1: The Flooded Forest
