

Tigers are beautiful, awe-inspiring creatures who have tended to lead secretive, elusive and nocturnal lives. But in Ranthambhore National Park in northern India, after more than a decade of protection under the umbrella of Project Tiger, the tigers have become less evasive, more visible and familiar with vehicles that attempt to spot and follow them.

Valmik Thapar and Fateh Singh Rathore have spent many years in Ranthambhore studying tigers and recently have been able to observe the secret lives of three tigresses with cubs of different ages.

Tigers: The Secret Life is packed with photographs that are stunning and genuinely unique and that provide new insights into the family life of this fascinating predator.
