Watch the World Change Before Your Eyes With the Science News Pangaea Mug!

All the wonders of the world's geologic history come to life on this magic mug. When cold, the mug shows the supercontinent Pangaea as it existed 200 million years ago when all of the Earth's continents existed as a single land mass. When filled with hot liquid the supercontinent breaks apart into the seven continents we recognize today. This is the mug for every coffee, tea or cocoa drinker on Earth!

Beige 12-ounce mug is printed in blue and brown with *SCIENCE NEWS* logo on reverse, \$7.00 each.

LEGO® Technic I focuses on simple machines, experimenting with stability and structures, levers and gears. For use in the home or at school, Technic I contains 179 elements including 5 types of gear wheel, beams, axles, a universal joint, a piston head and turntables, plus 20 full-color activity cards giving instructions on how to build 52 different models. All elements are easily stored in the sturdy case. Build a windmill, a crane and much more. *Recommended for ages 8 and up.* \$49.00

Hands-On Learning From LEGO®!

LEGO® Dacta educational products are a great way to teach your children the basic principles of physical science while demonstrating how much fun science can be!

LEGO® Technic II extends the principles of simple machines by adding the concept of motorization. With a 4.5-volt electric motor, children can bring their Technic projects to life. This set includes the motor, a battery pack, 8 kinds of gear wheel (including bevel, crown, worm and differential gears), all the elements from Technic I plus 20 full-color activity cards. Learn about belt transmissions, chain transmissions and motorized pulleys, among other things. *Recommended for ages 11 and up.* \$66.50
