STAYING WELL

Your
Complete
Guide to
Disease
Prevention

HARVEY B. SIMON, M.D.
HARVARD MEDICAL SCHOOL

"DON'T BECOME MY PATIENT! In my twenty-five years of medical practice, I have seen hundreds — perhaps thousands — of people die needlessly. As much as I love the practice of medicine, I must confess that I'm growing a bit weary of patching up problems that never should have happened in the first place. . . .

"That's why I wrote *Staying Well*. This book is a comprehensive approach to preventing disease. You *can* get control of your health. And you will enjoy the longer, healthier life that you have earned."

— from the preface of *Staying Well*

Most Americans are born healthy, but few of us stay well. But we can!

Armed with the latest research findings, Dr. Simon presents a balanced program that clarifies what is fact, what is medically prudent, and what is unfounded. He shares his twenty-five years of experience in medical practice, research, and teaching in a book that will make all the difference to its readers — to prevent illness, to enhance health, and to make sure they *don't* become his patients.

Written with passion, eloquence, and a personal touch, *Breaking the Maya Code* is an adventure in reading about one of the great archaeological sagas of the late twentieth century.

— Linda Schele, Co-author of

The Blood of Kings and *A Forest of Kings*

Twenty years ago the ruined monuments of Maya civilization were mute, the hieroglyphic inscriptions on magnificent stelae, temples, and palaces largely unread. Today, thanks to an extraordinary scientific breakthrough, these inscribed remains are revealing a history lost to humanity for a millennium. Far from being simple, peace-loving stargazers, they emerge as a much more complex culture: obsessed with warfare, dynastic rivalries, and ritual bloodletting, yet creators of supreme masterpieces in art and architecture.

This is a superbly readable detective story, a challenging and informed account of one of the most exciting intellectual adventures of our age.

This holiday, share **SCIENCE NEWS** with your friends. They will appreciate the opportunity to learn about new scientific discoveries that can affect their lives, their jobs, their future. And in this day of changing social directions, they will especially appreciate the perspective **SCIENCE NEWS** gives to urgent issues involving science and society.

Why? Because it is planned for people on the go. It reports key developments clearly, accurately, concisely—in about an hour's reading time per week. For someone with no more than an hour to spare, **SCIENCE NEWS** is a reliable summary of important news. For the reader with more leisure, it is a guide to subjects worth pursuing in more detail in other sources.

SCIENCE NEWS is the ideal gift for busy executives, professional people, science teachers, students and scientists in search of an overview of all major fields of science.

SPECIAL HOLIDAY SAVINGS!

Your first gift subscription of **SCIENCE NEWS** is \$39.50. Each additional one-year subscription is only \$34.00—and you may include your own renewal or new subscription at this money-saving rate.

The Cloud Chamber, An Introduction To The Science Of Particle Physics.

A unique science classroom experiment that demonstrates how clouds are formed. Cloud chamber includes a needle tipped with an alpha particle source, an absorbent base material and a styrofoam insulating block. When saturated with alcohol and cooled with dry ice, a cloud of alcohol vapor is created in the chamber. If a bright light source is introduced, the curved tracks of alpha particles appear as the condensation of droplets.
