## CELEBRATE NATURE

with these beautiful posters of  
appealing animals from around the world!

Don't miss this exclusive, first-time offer for SCIENCE NEWS' readers. Through the eyes of noted nature photographer Kjell Sandved you'll

- experience a wild pony's wondrous first crossing at Maryland's beautiful Chincoteague Island (*Poster A.*);
- explore the magnificence of the world's largest land mammal, the African elephant (*Poster B.*);
- be captivated by the mesmerizing blue eyes of the enchanting rare white tiger (*Poster C.*);
- feel the power and determination of the American Eagle superimposed on a splendid background of majestic purple mountains (*Poster D.*);
- enjoy the humor captured in this whimsical poster of the King Penguins captioned "Who?!" (*Poster E.*); and
- empathize with this orangutan, "Man of the Forest," — we've all had days like this! (*Poster F.*)

These beautiful, suitable-for-framing posters will be charming additions to your home or office, as well as great conversation starters! Delight the nature lover on your holiday gift list with one or all of these enchanting creatures!

All posters are surrounded by a handsome grey border and shipped in a protective tube. 18" x 24", \$8 each. Buy the entire set and save! All six posters can be yours for only \$39.95!
