

52nd Westinghouse Science Talent Search

\$205,000 in scholarships will be awarded to high school seniors in the 52nd Westinghouse Science Talent Search for research projects in science, mathematics and engineering.

One	\$40,000 scholarship	(\$10,000 per year for 4 years)
One	\$30,000 scholarship	(\$7,500 per year for 4 years)
One	\$20,000 scholarship	(\$5,000 per year for 4 years)
Three	\$15,000 scholarships	(\$3,750 per year for 4 years)
Four	\$10,000 scholarships	(\$2,500 per year for 4 years)
Thirty	\$ 1,000 scholarships	(payable upon matriculation)

Basic Requirements — Entrants must be high school seniors during the 1992–93 school year. Primary emphasis is placed on a written report of an independent research project in the physical sciences, behavioral and social sciences, engineering, mathematics, or biological sciences (excluding live vertebrate experimentation). The research project must be the work of a single individual. Group projects are not eligible. An Entry Form, designed to elicit evidence of creativity and interest in science, is also required, along with an official high school transcript, available standardized test scores, and statements and recommendations from teachers and/or supervising scientists.

Winners Selection — Three hundred semifinalists are selected from entries received (usually about 1,500) after careful evaluation by a team of 20 evaluators and judges specializing in a variety of scientific disciplines. Forty finalists are then selected from the semifinalists and invited to Washington, D.C. in March 1993, for final judging by a board of eight distinguished scientists.

The Rewards — Three hundred semifinalists benefit in the following ways: (1) recommendations to colleges and universities for admission and financial assistance, (2) certificates of achievement for students and teachers, (3) a sense of accomplishment and a measure of self-esteem that comes from finishing a difficult assignment. The forty finalists, selected from the semifinalists, are also awarded a trip to Washington for the five-day, all-expenses-paid Science Talent Institute for final judging and a chance to share \$205,000 in scholarships.

Sponsors — Since its inception in 1942, the Science Talent Search has been funded by Westinghouse Electric Corporation and administered by Science Service, a Washington-based nonprofit organization.

Entry Deadline

(varies from year to year)

All entries for the 52nd Westinghouse Science Talent Search (1992-93 school year) *must be received prior to midnight, Tuesday, December 1, 1992*, at Science Service, 1719 N Street, N.W., Washington, DC 20036. This means the entry must either be postmarked by November 24, 1992 *OR* the entry must be sent by a delivery service that guarantees delivery by Tuesday, December 1, 1992. If an entry arrives late due to the fault of the carrier, but was postmarked by November 24, 1992 or sent via a delivery service that guaranteed in writing the package would arrive by December 1, 1992, the entry will be accepted for judging provided that the judging process has not been completed.

**SEEKING — and Finding —
SCIENCE TALENT**

**A 50-Year History of the
Westinghouse Science Talent Search**

Author Tom K. Phares provides a comprehensive history of the Westinghouse Science Talent Search from its inception in 1942. Entertaining prose leads you from the meeting of the two founders of the STS at the World's Fair in 1939; to the accomplishments of past winners — five of whom went on to become Nobel Laureates; to the dedicated individuals behind the winners; through the arduous judging and evaluation process; to the educational opportunities that open up to STS finalists. Also included as appendices in this informative review is a list of the finalists' names from 1942 to 1990; lists of major honors received by former winners; and a list of the 32 high schools that have produced the most winners. (Published by Westinghouse Electric Corporation, 1990; paperback; 122 pp.)

COLOR AND LEARN

Experience how a well-designed picture, color-completed by you, almost magically creates understanding more completely and quickly than reading page after page of descriptive text. For students, professionals, or any reader interested in the many colors of science.

ANATOMY. In addition to teaching the visual details of human anatomy, this book teaches the terminology of anatomy as part of the coloring process. *302 pages, 142 plates, 1977.*

ZOOLOGY. Organized into major animal groups, from simple to complex, this book emphasizes representative and well-known members of each group. *238 pages, 107 plates, 1982.*

BOTANY. The structure and function of plants, a survey of the plant kingdom, and associated botanical terminology are all learned through the coloring process. *224 pages, 100 plates, 1982.*

BIOLOGY. Learn about the basic processes of life and the interactions of living things with their environment. *256 pages, 111 plates, 1986.*

HUMAN BRAIN. Learn about the structure and function of the human brain. The material included here represents the state-of-the-art knowledge about the brain and how it works. *301 pages, 138 plates, 1985.*

\$14.00 each. All 5 for \$65.00
