Frozen in Time

THE TRANSFORMED CELL

UNLOCKING THE MYSTERIES OF CANCER

STEVEN A. ROSENBERG, M.D., Ph.D.,
AND JOHN M. BARRY

"If you want to read a book that has the accuracy of science and the engaging interest of a detective novel, try this one."

— Vincent T. DeVita, Jr., M.D.

Benno C. Schmidt Chair in Clinical Oncology,
Memorial Sloan-Kettering Cancer Center

In 1968, Dr. Steven Rosenberg, one of the world's leading surgeons, encountered a patient whose cancer had mysteriously disappeared. Could the body itself, he wondered, have mounted a massive immune response to the cancer? From that point on, Dr. Rosenberg set out to see if immunotherapy, and later gene therapy, could succeed where surgery, chemotherapy, and radiation had failed.

The Transformed Cell provides an extraordinary glimpse inside the workings of a scientific process. Moreover, it tells a story of hope: of a devoted doctor's exciting advances in halting the spread of cancer.

"A solid exposé that reads like a psychological detective thriller. . . . This brilliant, meticulously researched book probes what many see as the failure of psychoanalysis to confront the real world."

— *Publishers Weekly*

Jeffrey Moussaieff Masson, former projects director of the Freud Archives, asserts that Freud abandoned a valid scientific finding because he was personally reluctant to face the reality of child sexual abuse and feared his colleagues' negative reaction to such a shocking theory. Freud's revised theory — that his patients' childhood "memories" of seduction and rape were in fact fantasies — became and remains the basis for the whole science of psychoanalysis.

On the basis of letters long kept from public view and other information he discovered at the archives and elsewhere in Europe, Masson offers a devastating, thought-provoking examination of the formative years of psychoanalysis and calls into question its very foundations. This new edition cogently examines the impact psychoanalysis has had on the current furor over child sexual abuse.
