The Diary of William Harvey

JEAN HAMBURGER, M.D.

THE IMAGINARY JOURNAL OF THE PHYSICIAN
WHO REVOLUTIONIZED MEDICINE—

“A superb adventure in history, science, and imagination. All who read it will agree, and I hope that they will be many.”

—JOHN KENNETH GALBRAITH, Harvard University

Through this imaginary diary, we travel with Harvey (discoverer of the circulation of the blood) through a Europe wracked by war, religious strife, and plague, and encounter some of the greatest minds of his day—Francis Bacon, Thomas Hobbes, Galileo, Descartes, Shakespeare.

255 pp. Paper, \$14.95; Cloth, \$35.00

“The best way to learn the constellations that we have ever run across.”

— Sky & Telescope

Designed with the beginner in mind and useful to anyone interested in astronomy, *Star Maps for Beginners* includes:

- ★ 12 complete maps — one for each month — showing the position of the constellations viewed from every direction
- ★ a synoptic table that shows how to choose the proper map for use at any time
- ★ special tables that give approximate positions of the planets for the years 1992 through 1997
- ★ the most up-to-date overview of the solar system available today
- ★ a full chapter on the history and development of the constellations, and the ancient legends and mythological lore surrounding them
- ★ a special section on meteors — how they originate and when and where to spot them.

— from the publisher

Fireside, 1992, 63 pages, 8½" x 11", paperback, \$10.00
