Though we share 98 percent of our genes with the chimpanzee, our species evolved into something quite extraordinary. Jared Diamond explores the fascinating question of what in less than 2 percent of our genes has enabled us to found civilizations and religions, develop intricate languages, create art, learn science — and acquire the capacity to destroy all our achievements overnight. *The Third Chimpanzee* is a tour de force, an iconoclastic, entertaining, sometimes alarming look at the unique and marvelous creature that is the human animal.

Dorling Kindersley, Inc. 1992, 256 pages,  
5 1/4" x 8 1/2", paperback, \$17.95

This book is designed for all those who love cats. *The Eyewitness Handbook of Cats* traces the evolution of the domestic cat, explains the differences between purebred and non-purebred cats, looks at how cats are classified, and examines feline anatomy in detail. It also gives tips on showing and on choosing the right cat for you and your family.

The book provides a visual identification key that helps you recognize the different types of cats and guides you to the correct entry. Each entry combines a precise description with annotated photographs to highlight the main characteristics and distinguishing features. A fur "swatch" shows the precise type and color of the fur, and color-coded bands provide at-a-glance facts for quick reference. Finally, a concise glossary provides instant understanding of breeders' terms.

*The Eyewitness Handbook of Cats* is designed for all cat lovers!
