Stars and Planets—
The Sierra Club Guide to Worldwide Sky Watching and Direction Finding
by *W.S. Kals*

This reference helps you learn the features of the sky and use them to guide your way in observing the heavens. You use an easily found reference line and the brightest stars in

the sky to help you find your way, any date, or any time. You'll learn techniques for sky exploration in all parts of the globe.

The Observer's Sky Atlas—With 50 Star Charts Covering the Entire Sky
by *E. Karkoschka*

This easy-to-use atlas includes charts for naked-eye observation, binocular astronomy, and telescope exploration. The Atlas divides the sky into 48 regions grouped under three sections for the northern, equatorial and ecliptic, and southern skies. Right-hand pages feature clutter-free charts and one label identifying major objects of interest. Left-hand pages include magnitude, spectral type, name and comments, distance, coordinates, and other detailed information.

Touring The Universe Through Binoculars
by *Philip S. Harrington*

Here is the most complete guide yet to making the most of this powerful and versatile instrument. This book features many observing projects for which using binoculars is not only possible, but preferable to telescopes. Publisher's Price: \$24.95

Whether you're a professional or amateur enthusiast, THE ASTRONOMY BOOK CLUB offers you the finest astronomy materials available. You'll enjoy atlases and how-to manuals, as well as textbooks and popular guides covering the latest discoveries, and the opportunity to purchase them conveniently and inexpensively.
