## *The Genesis of Heart Disease*

With deep compassion and humanity, George Howe Colt helps us understand how and why suicide happens and what we can do to help. *The Enigma of Suicide* combines powerful case histories with a fascinating, multidisciplinary survey of current knowledge to offer new insight into every aspect of this widespread yet little-understood phenomenon. Colt clarifies:

- *the various motives for committing suicide and the meaning the act may have for the person who kills himself*
  - *who commits suicide and why certain people and groups seem more susceptible to it than others*
  - *warning signs and the possibilities for prevention*
  - *both sides of the growing right-to-die debate*
  - *how suicide affects those left behind and their ways of coping*
- from Touchstone Books

*"A great and moving triumph . . . Not only is this a masterly piece of journalism, it is also, strangely enough, a profoundly life-affirming study."*

PROFESSORS OF NUTRITION AND MEDICINE, TUFTS UNIVERSITY WITH JACQUELINE THOMPSON

*"If ever a book could take the worry out of aging, this one's it."*

— Kenneth H. Cooper, M.D., founder, The Cooper Clinic

Exciting new evidence from the USDA Human Nutrition Research Center on Aging at Tufts University has demonstrated that the body's decline is due *not* to the passing of years but to the combined effects of inactivity, poor nutrition, and illness — much of which can be controlled.

Providing dietary guidelines, self-tests for evaluating your physiological age, and exercise programs for every level of fitness, *Biomarkers* will change forever the way you think — and what you do — about aging.
