

**Shells of the Land and Sea** is an intriguing collage of shells from a photograph by Pete Carmichael.

This poster illustration of **Our National Parks** contains geographical landmarks, wildlife and plant life from 34 National Parks and Monuments. These items are in approximate geographical order. For example, western parks are located to the left side, eastern parks to the right.

Expressly from Science News Books are five glorious Museum Puzzles featuring beautiful color photographs and exquisite watercolor and oil paintings of science and nature subjects at their finest. Enjoy challenging your mind and creating stunning full-color jigsaw images. These puzzles also help you learn about the subject matter as each contains a labeled color photograph of the image distinguishing what each element is and, when appropriate, where it is found. Choose from *Shells of the Land and Sea*, *Our National Parks*, *Wetlands*, *Gemstones*, and *Tropical Fish of the World*. **Each puzzle is comprised of 500 pieces, measures 14" x 18", and costs only \$12.95.**

A watercolor adaptation of the **Wetlands** by Larry Duke exemplifies this habitat at every level sky, land, water surface, and below sea level. An accompanying flyer identifies most of the creatures in the picture.

The coral reef explodes with beautiful color photographs by Aaron Normal of its inhabitants the Harlequin Tuckfish of the Tropical Western Pacific, the Redtail Wrasse of the Tropical Central Pacific, and 42 other **Tropical Fish of the World**.
