

"I have to tell you that I've learned more useful astronomy from your product in a few months than I did in all my time in the classroom. Thank you for enriching my life."

Leslie Kinton, Guelph, Ontario

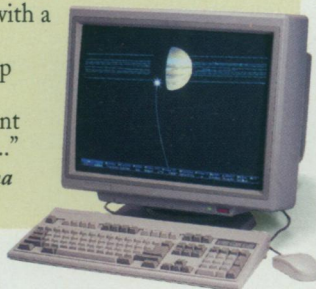

Natural Astronomy.

From ancient eclipses to future comet collisions, explore space and time with the most comprehensive dynamic model of the sky and solar system ever created.

"Dance has an enormous appeal, because it combines rigorous modeling criteria with a subtle, intuitive approach to dynamic orbital configurations. Please, keep up this kind of work. It is an encouraging example of commitment to high standards in scientific software..."

Francisco N. Laprida, Buenos Aires, Argentina

DANCE OF THE PLANETS®

arc SCIENCE SIMULATIONS

1-800-SKY-1642

P.O. Box 1955N Loveland, CO 80539 1-303-667-1168 FAX: 1-303-667-1105

IBM compatibles, minimum 286, 640k RAM. VGA graphics, hard disk, math co-processor recommended. Literature and \$10 demo available.

ORDER NOW

Includes Comet Shoemaker-Levy 9 Jupiter impact simulations!

New version 2.7 starting at a low \$145. 30 day return privilege.

Detect and Plot Radiation On Your PC (Including Laptops)

Open a door to the fascinating world of nuclear science with the RM-60 Micro Roentgen Radiation Monitor. This palm-sized unit detects Alpha, Beta, Gamma & X-Rays. Displays 1000 times the resolution of survey geiger counters. Track Radon gas, find sources. Check food and water for contamination. Easy to setup and run.

Learn about radioactivity. Exciting computer application. Demonstrate alpha emission from smoke detector, beta and gamma emission from lantern mantle, etc. Plot background cosmic rays, rocks, bricks, plane ride. Wipe tissue on T.V. screen then generate a beautiful decay plot of the collected Radium B (Radon daughter, half life: 27 mins.).

Rugged and accurate digital circuitry, needs no adjustments, no batteries. Should last a lifetime. Plugs into computer's serial port by way of telephone wire.

Superb full color (& B.W.) user friendly software, plus TSR program, included. Thousands sold for over five years. Call or write for PC Mag. & Byte reviews.

Complete RM 60 System: \$149.50

VISA/MC/EURO 45 day \$ back.

To order or for more information call: (800) 729-5397

Also available: LCD-60 Digital readout for use without computer, RM-70 & RM-80 pancake units.

Join Roger Tory Peterson in a unique visit to his personal "bird garden." America's best-known bird-watcher and author of the landmark *Field Guide to the Birds* reveals the secrets of how he attracts birds to his own yard. Discover how to turn your home into a haven for birds with:

- Food for seed eaters, insect eaters, and nectar seekers.
- Nesting shelters for bluebirds, martins, swallows, owls, and wrens.
- Birdbaths and the irresistible lure of running water.
- Plants that feed and protect your birds year-round.

Enjoy the beauty of more than 80 species of birds in the video reference you'll turn to again and again to bring the birds to your home.

Nature Science Network, 1993, VHS, approx. 55 min., \$29.95 each

Chase after a butterfly and it will fly away . . . but use the suggestions in this video and the butterflies will come to you! No back yard is too small for the perfect butterfly garden. In *Attracting Butterflies* you'll

- learn about the natural history of the butterflies — their needs, survival strategies, flight times, and reproductive cycles.
- Learn about the plants and flowers irresistible to the butterflies, both as food for the caterpillars and nectar sources for the adults.
- Enjoy the beauty of America's best-loved butterflies — the swallowtails, the monarchs (masters of migration), painted ladies, emperors, queens, in short, the lepidopteran royalty — yours to court in the sunshine of your garden.

It's Experimental!

One of the best ways for children to learn is by doing, and these science experiment books offer a multitude of opportunities for them to do just that. Whether your child needs a science fair project, an activity for a rainy day, or is just looking for a little fun, this assortment of project books, geared to youngsters of all ages, will fill many voids.

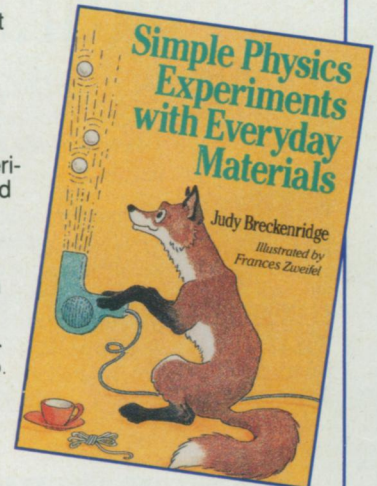

Make science fun with 101 exciting step-by-step experiments that are safe and easy to do at home. Science writer Neil Ardley shows how you can use everyday objects to discover the basic principles of science and understand how these apply to the world around you. So if you want to make a volcano erupt, see around corners, find out how your eyes work, or build an electromagnet, this fascinating book will show you how.

—from Dorling Kindersley
Recommended for ages 6-10
Dorling Kindersley, 1993,
120 pages, 8 1/4" x 11",
hardcover, \$16.95

- Crush a plastic bottle without touching it
 - Make money "talk"
 - Launch your own astronauts
 - Go fishing in your kitchen
- It's not only fun, it's physics! These and dozens more experiments will help you understand the wonderful and magical things happening everywhere in the world around you. And everything you need is right in your own home.

—from Sterling Publishing Co.
Recommended for age 10 and up.
Sterling Publishing Co. 1993,
128 pages, 5 1/4" x 8 1/4",
paperback, \$4.95

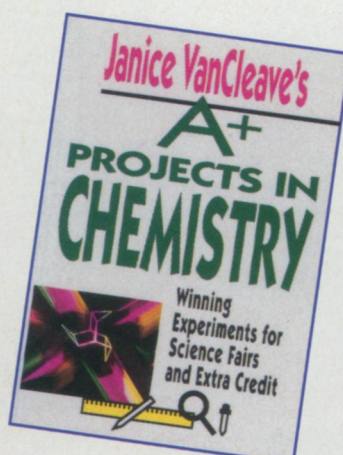

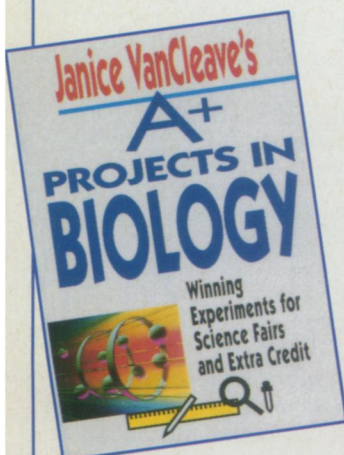

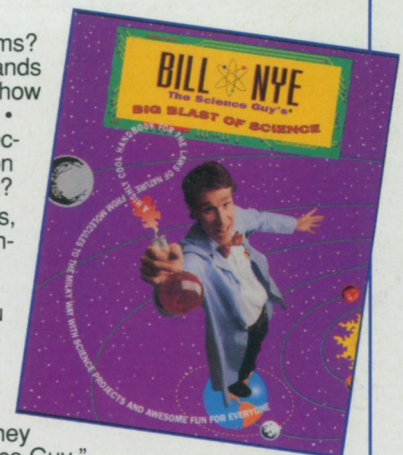

Do you know:

- that everything you see is made up of 92 kinds of atoms?
- why this book and your hands are mostly empty space?
- how to launch a hot-air balloon?
- how to build a miniature electric motor?
- how a television show arrives at your TV set?

Read about quarks, quasars, and the questions that scientists are still trying to figure out. And find spectacular science projects that let you see how cool science guys and gals can be. Bill Nye the Science Guy® hosts the syndicated television show on science, "Disney Presents Bill Nye the Science Guy."

—from Addison-Wesley

Recommended for age 10 and up. Addison-Wesley, 1993,
172 pages, 7 1/4" x 9", paperback, \$12.95

These step-by-step guides explore 30 different topics and offer dozens of experiment ideas that don't involve any complicated or expensive equipment. The books also include charts, diagrams, and illustrations. Here are just a few of the topics you'll be investigating:

- Seed germination • Chromatography • Food preservatives • Cellular respiration • Operant Conditioning • Acid/base reactions • Polymers • Crystals • Electrolytes • Denaturing Proteins

You'll be amazed at how easy it is to turn your ideas into winning science fair projects.

—from John Wiley & Sons

Recommended for age 12 and up.
