Seeing the Sky

Over 100 naked-eye activities bring the universe into your backyard. Find out how to:

- See Venus as a morning star and an evening star...in the same day
- Split the Big Dipper's Mizar-Alcor and other double stars
- Estimate the length of a bright comet's tail and observe little-known meteor showers
- Identify dozens of lunar features with the naked eye

Seeing the Deep Sky

35 telescopic explorations take you to the outer limits of the universe. You'll discover how to:

- Estimate the temperature of a star by its color
- Observe the much-studied filaments of the Crab and Veil Nebulae
- Calculate a variable star's period and amplitude
- Locate galaxies of all types
