The Weekly Newsmagazine of Science

Science Service Publication  
Volume 145, No. 23, June 4, 1994

Alfred Scott McLaren	Publisher
Patrick Young	Editor
Blair Burns Potter	Managing Editor
Dan Skripkar	Production/Design Director
Greg W. Pearson	Associate Editor
Janet Raloff	Senior Editor Environment/Policy
Ron Cowen	Astronomy
Bruce Bower	Behavioral Sciences
Richard Lipkin	Chemistry/ Materials Science
Richard Monastersky	Earth Sciences
Tina Adler	General Science
Kathy A. Fackelmann, Elizabeth Pennisi	Life Sciences/ Biomedicine
Ivars Peterson	Mathematics/Physics
Larry Norland	Editorial Assistant
Damaris Christensen	Science Writer Intern
Cait Anthony	Books/Resource Manager
Donald R. Harless	Advertising/Business Manager

SCIENCE NEWS (ISSN 0036-8423) is published weekly on Saturday, except the last week in December, for \$39.50 for 1 year or \$68.00 for 2 years (foreign postage \$6.00 additional per year) by Science Service, Inc., 1719 N Street, N.W., Washington, DC 20036. Second-class postage paid at Washington, DC, and additional mailing office. POSTMASTER: Send address changes to SCIENCE NEWS, P.O. Box 1925, Marion, OH 43305. Change of address: Four to six weeks' notice is required — old and new addresses, including zip codes, must be provided.

### Beyond the beholder's eye

Certainly, there are objectively measurable elements to beauty ("Facial beauty may lie more than skin deep," SN: 3/19/94, p.182), but I have two observations that qualify Perret and May's studies.

First, as far as popular culture and estimates of beauty are concerned, England and contemporary Japan are hardly poles apart. The fact that many Japanese undergo eye surgery to make their eyes wider is just one example of how Western movies, commercials, and other products have influenced Japanese popular culture.

Second, I think most stars, such as Madonna, who are popular for their beauty would agree that it's not what you've got, but what you do with it.

Chris Cosner

Science Service, which publishes SCIENCE NEWS, is a nonprofit corporation founded in 1921. It gratefully accepts tax-deductible contributions and bequests to assist its efforts to increase the public understanding of science, with special emphasis on young people. More recently, it has included in its mission increasing scientific literacy among members of underrepresented groups. Through its Youth Programs it administers the International Science and Engineering Fair, the Science Talent Search for the Westinghouse Science Scholarships, and publishes and distributes the *Directory of Student Science Training Programs for Precollege Students*.

Board of Trustees — *Chairman*, Glenn T. Seaborg; *Vice Chairman*, Gerald F. Tape; *Secretary*, David A. Goslin; *Treasurer*, Willis Harlow Shapley; Joseph W. Berg Jr.; Robert W. Fri; J. David Hann; Dudley Herschbach; Shirley M. Malcom; Elena O. Nightingale; Ben Patrusky; Peter H. Raven; H. Guyford Stever; Sanford J. Ungar; Deborah P. Wolfe. *Honorary Trustees* — Edward Bliss Jr.; Bowen C. Dees; O.W. Riegel; John Troan.

President: Alfred Scott McLaren; Vice President and Business Manager: Donald R. Harless.

and cultures — including relatively isolated hunter-gatherers — rank the same racially diverse faces as most attractive. The point of these studies is that evolved preferences provide the foundation for judgments of facial beauty, on which cultural factors build. In other words, what you do with what you've got — and the decision to do something in the first place — depends on certain universal preferences that go far beyond fads.

— B. Bower

### A fossil in hand

The moral imperative to return museums' inappropriately obtained collections of modern, identifiable Native American remains (and artifacts) for proper interment is undeniable ("Fossils on File," SN: 3/19/94, p.186). But insisting that any and all American (U.S.) indigenous human remains be repatriated is irrationality on stilts.

In Colorado, 5,000-year-old remains were recently "repatriated" to an undisclosed site by the Southern Utes. (The new law demands repatriation to the nearest indigenous commu-

nity.) But there's nothing in the anthropological record indicating that anything even remotely Ute was in existence 5,000 years ago. By this logic, the Alpine iceman should be "repatriated" to the nearest Italian village for burial by the largest local religion.

Important information will be lost through ludicrous application of the new law. Only recent advances in technology and technique have made possible the current explosion in our knowledge of dinosaurs. Who's to say such advances can't take place in anthropology as well?

A fossil in hand is worth a thousand bytes.

J. M. Schell
