**DREAMS OF A FINAL THEORY**  
*The Search for the Fundamental Laws of Nature*

Steven Weinberg  
 One of the world's most distinguished physicians, Nobel laureate Steven Weinberg, peers beyond current scientific knowledge to imagine the shape of the final theory of all fundamental physical forces — its impact on the future of science and the human spirit.  
 336 pages      Publisher's price: \$25.00

**THE MIND OF GOD**  
*The Scientific Basis for a Rational World*

Paul Davies  
 Can science ever unlock the secret of creation? Is there a point at which science must say a God exists? In his quest for the ultimate explanation of existence, Davies explores the origin and evolution of the cosmos, the nature of life and consciousness, parallel universes and the possibility that our universe is no random accident.  
 254 pages      Publisher's price: \$22.50

**THEORIES OF EVERYTHING**  
*The Quest for Ultimate Explanation*

John D. Barrow  
 Up to twenty-two additional dimensions of space, "constants" of nature whose value has changed, multiple universes interacting through wormholes linking remote corners of time and space — these are just some of the quirks of string theory, the most intriguing candidate for a viable theory of everything. Discover how scientists reaching for a new cosmic Rosetta Stone are encountering a universe far more devious and slippery than anyone imagined.
