The Weekly Newsmagazine of Science

Science Service Publication  
Volume 146, No. 23, December 3, 1994

Alfred Scott McLaren	Publisher
Patrick Young	Editor
Blair Burns Potter	Managing Editor
Dan Skripkar	Production/Design Director
Greg W. Pearson	Associate Editor
Janet Raloff	Senior Editor
Ron Cowen	Environment/Policy
Bruce Bower	Astronomy
Richard Lipkin	Behavioral Sciences
Richard Monastersky	Chemistry/ Materials Science
Tina Adler	Earth Sciences
Kathy A. Fackelmann, Elizabeth Pennisi	General Science
Ivars Peterson	Life Sciences/ Biomedicine
Larry Norland	Mathematics/Physics
Adrienne C. Brooks	Editorial Assistant
Cait Anthony	Science Writer Intern
Donald R. Harless	Books/Resource Manager
	Advertising/Business Manager

SCIENCE NEWS (ISSN 0036-8423) is published weekly on Saturday, except the last week in December, for \$44.50 for 1 year or \$78.00 for 2 years (foreign postage \$6.00 additional per year) by Science Service, Inc., 1719 N Street, N.W., Washington, D.C. 20036. Second-class postage paid at Washington, D.C., and additional mailing office. POSTMASTER: Send address changes to SCIENCE NEWS, P.O. Box 1925, Marion, Ohio 43305. Change of address: Four to six weeks' notice is required — old and new addresses, including zip codes, must be provided.

## Letters

### Remembering a lesson of the past

I would like to comment on the proposed testing of a genetically engineered insect-killing virus in a real-world environment on one-fifth-acre plots ("Mothra Meets Its Match," SN: 9/3/94, p.154). Has anyone considered that this venomous culture may also kill birds that feed on these insects?

Remember what DDT did years ago to the bird population: It can happen again.

Walter S. Zahn  
Holmes Beach, Fla.

Researchers believe these viruses kill only the insects. — T. Adler

### Luthier's invention

In 1950, a Parisian luthier replaced the sound post in a fine cello belonging to cellist Madeline Foley with his patented sound post ("To Build a Better Violin," SN: 9/3/94, p.152). It was of comparable length but hollow, with a hole in the side at each end.

## This Week

- 372 Fanfare over Finding First Fat Gene
- 372 Breast cancer gene hides many mutants
- 373 Chain of command: Wolves help trees thrive
- 373 Prostate cancer: Diagnosis by computer
- 374 Before the quake: Detecting the slow groan
- 374 Researchers spot another blinding gene
- 375 Computing with charged quantum-dot arrays
- 375 Metal dendrites sprout in microgravity

## Research Notes

- 383 Biology
- 383 Environment

## Articles

- 376 A New Gravity?

Cover: From apples to galaxies, matter throughout the universe falls under the influence of gravity. Albert Einstein's general theory of relativity posits that gravity is simply a consequence of the curvature of space and time. But two researchers contend that Einstein's formulation of his theory may have serious shortcomings. (Illustration by G. Dana Berry, Space Telescope Science Institute)

Science Service, which publishes SCIENCE NEWS, is a nonprofit corporation founded in 1921. It gratefully accepts tax-deductible contributions and bequests to assist its efforts to increase the public understanding of science, with special emphasis on young people. More recently, it has included in its mission increasing scientific literacy among members of underrepresented groups. Through its Youth Programs it administers the International Science and Engineering Fair, the Science Talent Search for the Westinghouse Science Scholarships, and publishes and distributes the *Directory of Student Science Training Programs for Precollege Students*.

Board of Trustees — *Chairman*, Glenn T. Seaborg; *Vice Chairman*, Gerald F. Tape; *Secretary*, David A. Goslin; *Treasurer*, Willis Hartow Shapley; Joseph W. Berg Jr.; Robert W. Fri; J. David Hann; Dudley Herschbach; Shirley M. Malcom; Elena O. Nightingale; Ben Patrusky; Peter H. Raven; H. Guyford Stever; Sanford J. Ungar; Deborah P. Wolfe. Honorary Trustees — Edward Bliss Jr.; Bowen C. Dees; O.W. Riegel; John Troan. President: Alfred Scott McLaren; Vice President and Business Manager: Donald R. Harless.

Madeline and I were amazed at the improvement in the cello's sound, as was her teacher, Pablo Casals. Later, I had the luthier install a hollow sound post in my violin, and it enhanced the violin's sound as well.

To my mind, this little-known invention marked the greatest improvement in the tonality of stringed instruments in the past 300 years.

James S. Thurston  
Noblesville, Ind.

### Good health boosts social life?

Frankly, I am fed up with theories that claim a "positive attitude" or "social involvement" makes people healthier ("Death comes knocking when you're alone," SN: 9/3/94, p.159).

I am 44 and have had a chronic illness since age 14. When I am well, I am a very outgoing, socially active person. When I had to quit teaching public school, it was not by choice or lack of social involvement (one can't get more socially involved than enjoying working with 35 youngsters every day) but because my chronic illness had returned.

The one line in the SCIENCE NEWS article —

"Perhaps people with better social lives are healthier to start [with]" — makes a lot more sense.

Barbara E. Peterson  
Long Beach, Calif.

### New twist to T cell therapy

"T cells cure leukemic mice" (SN: 9/10/94, p.165) describes a new twist in cancer therapy in which T cells from a child diagnosed with leukemia are used to treat cancerous mice. Besides curing the mice of an early form of leukemia, this approach to cancer therapy has an unanticipated benefit: Finally, investigators are exploring an area of medical research that should please the animal rightists.

Michael D. Desch  
Greenbelt, Md.
