The Weekly Newsmagazine of Science

Science Service Publication
Volume 147, No. 9, March 4, 1995

Alfred Scott McLaren	Publisher
Patrick Young	Editor
Blair Burns Potter	Managing Editor
Dan Skripkar	Production/Design Director
David Lindley	Associate Editor
Janet Raloff	Senior Editor Environment/Policy
Ron Cowen	Astronomy
Bruce Bower	Behavioral Sciences
Richard Lipkin	Chemistry/ Materials Science
Richard Monastersky	Earth Sciences
Tina Adler	General Science
Kathleen Fackelmann	Life Sciences/ Biomedicine
Ivars Peterson	Mathematics/Physics
Damaris Christensen	Editorial Assistant
Jocelyn Kaiser	Science Writer Intern
Cait Anthony	Books/Resource Manager
Donald R. Harless	Advertising/Business Manager

SCIENCE NEWS (ISSN 0036-8423) is published weekly on Saturday, except the last week in December, for \$44.50 for 1 year or \$78.00 for 2 years (foreign postage \$6.00 additional per year) by Science Service, Inc., 1719 N Street, N.W., Washington, D.C. 20036. Second-class postage paid at Washington, D.C., and additional mailing office. **POSTMASTER:** Send address changes to SCIENCE NEWS, P.O. Box 1925, Marion, Ohio 43305. Change of address: Four to six weeks' notice is required — old and new addresses, including zip codes, must be provided.

Articles

136 Bacterial Chatter

Cover: Faced with starvation, bacterial colonies can spread out into elaborate networks. The colonies' intricate patterns reveal clues as to how the microorganisms may communicate with one another. In this photograph, a bacterial colony branches out, then curls into chiral tendrils. (Photo: Eshel Ben-Jacob *et al.*)

Science Service, which publishes SCIENCE NEWS, is a nonprofit corporation founded in 1921. It gratefully accepts tax-deductible contributions and bequests to assist its efforts to increase the public understanding of science, with special emphasis on young people. More recently, it has included in its mission increasing scientific literacy among members of underrepresented groups. Through its Youth Programs it administers the International Science and Engineering Fair, the Science Talent Search for the Westinghouse Science Scholarships, and publishes and distributes the Directory of Student Science Training Programs for Precollege Students.

Board of Trustees — *Chairman*, Glenn T. Seaborg; *Vice Chairman*, Gerald F. Tape; *Secretary*, David A. Goslin; *Treasurer*, Willis Harlow Shapley; Joseph W. Berg Jr.; Robert W. Fri; J. David Hann; Dudley Herschbach; Shirley M. Malcom; Elena O. Nightingale; Ben Patrusky; Peter H. Raven; H. Guyford Stever; Sanford J. Ungar; Deborah P. Wolfe. *Honorary Trustees* — Edward Bliss Jr.; Bowen C. Dees; O.W. Riegel; John Troan. *President*: Alfred Scott McLaren; *Vice President and Business Manager*: Donald R. Harless.

Alternative reading

I call to your attention two books in the Science News Books Holiday Gift Collection 1994 brochure (SN: 11/19/94, p. 335). Neither contains accurate information.

The Complete Medicinal Herbal by Penelope Ody proposes as its theme that certain herbs may be used for medicinal purposes. Although this is true in undeveloped countries, the dangers of using them far outweigh the benefits. The example given of *ma huang* is typical. Deaths have been reported from heart stimulation because of the ephedrine-like compounds in the herb.

The major reason medicinal herbs are either dangerous or ineffective is that for many of them the claims are simply untrue, and for others, although active ingredients are present, their dosages cannot be controlled.

The other book is *Natural Alternatives to Over-the-Counter and Prescription Drugs* by Michael T. Murray. There is no scientific

validity to naturopathy or to the claims for herbs, vitamins, and other products that go with the practice.

I wish to suggest that you list such books as *The Health Robbers* by Steven Barrett and William Jarvis, "Alternative" in *Health Care, a Comprehensive Guide* by Jack Raso, and *A Consumers Guide to "Alternative Medicine,"* by Kurt Butler.

Tried and true

As a family physician who practiced from 1947 to 1988, I wish to address "Middle Ear Infections in Children" (SN: 11/19/94, p.332).

When I was growing up in the 1920s, there were constantly some kids in the neighborhood who had cotton wads in their ears to soak up the malodorous, purulent discharge from their otitis media. Radical mastoidectomy, frequently with facial paralysis, was a common surgical procedure in the ENT [ear,

nose, throat] field. Meningitis and brain abscesses were not rare.

After sulfonamides were introduced in the late 1930s and penicillin in the early 1940s, ear infections were cleared up medically, and mastoidectomies became rare.

I realize that what I have written is anecdotal, but I firmly believe that the practical value of antibiotics in middle ear infections of children was proven — and the issue laid to rest — 50 years ago.

Leo Lewin

Proverbial science?

When I read "Depressed to the bone . . ." (SN: 11/26/94, p.360), a Bible text that I memorized in my youth popped into my head. "A merry heart doeth good like a medicine, but a broken spirit drieth the bones" (Proverbs 17:22).

Maybe this isn't such a new discovery after all!
Shirley Cody
Portland, Ore.
