Science with Style and Substance

Illustrating C

Second Edition Donald G. Alcock

"...a useful reference book...The book covers not only the basic elements of C, but C libraries; algorithms; and essential programming techniques such as symbol state tables, binary trees, linked lists, manipulation of strings, and parsing of algebraic expressions."

> - M. J. Iordache, Computing Reviews

1994 223 pp. 0-521-46821-3 Spiral bound \$19.95

New Edition...

Invention and Evolution

Design in Nature and Engineering

Second Edition

Michael French

From reviews of the First Edition...

"...the book succeeds admirably...gives a sufficiently broad treatment of design principles to be recommended for use far beyond the shores of Great Britain. Coverage is both fresh and nontrivial."

- R. J. Foster, Applied Mechanics Review 1994 387 pp.

0-521-46503-6 Hardback \$79.95 0-521-46911-2 Paperback \$29.95

Vertebrate Zoology

An Experimental Field Approach

A major new book in vertebrate zoology intended to lead readers away from purely descriptive zoology into an experimental approach that emphasizes asking and answering questions about nature.

1994 363 pp.

Hardback \$34.95 0-521-41703-1

Physics and Our View of the World

Jan Hilgevoord, Editor

A thought-provoking examination of the claims of modern physics and their impact on our views of religion and the world.

1995 314 pp. 0-521-45372-0 0-521-47680-1

Hardback Paperback \$49.95 \$22.95

Out of Sight!

From Quarks to Living Cells

Sven Kullander and Borje Larsson

An armchair explorer's guidebook into elusive and invisible worlds of living cells, atoms, and molecules as they are found in everyday objects, as well as in more exotic and dramatic forms of matter, such as antimatter, stars, and black holes.

1994 292 pp.
