

# Sing Along with the Birds with Tapes and CDs

Each *Birding by Ear* set comes with three tapes or CDs and is accompanied by a booklet that shows line drawings of each bird with brief descriptions of its habitat and voice characteristics. Good for the beginning birder or advanced visual birder.

“*Birding by Ear* is a unique and important new tool for birders. Now they can easily master one of the most useful and difficult field skills—the ability to recognize birds by their songs and calls. Just as my *Field Guide* shows what to look for, *Birding by Ear* points out exactly what to listen for to tell one bird from another.”

—Roger Tory Peterson

habitat, such as Pacific coastal forests, urban parks, and deserts and canyons.

Now available, by popular demand, *More Birding by Ear* for the Eastern and Central

regions. It covers 90 species, including virtually all the warblers, plus many finches and sparrows, shorebirds, waders, gulls and terns, and dozens of other birds. Like all the *Birding by Ear* volumes, it groups birds by the similarity of their sounds and then points out the differences that distinguish each species.

**Eastern:** Houghton Mifflin, 1989 (tapes), 1994 (CDs), 3 tapes or CDs in each set, 64-page booklet, \$35.00

**Western:** Houghton Mifflin, 1990 (tapes), 1994 (CDs), 3 tapes or CDs in each set, 64-page booklet, \$35.00
