**When Life Got  
Large**

This updated and expanded *Do's and Taboos Around the World* provides even more facts, tips, and cautionary tales—gleaned from the experiences of more than five hundred international business travelers—as well as:

- ☛ Information on protocol, customs, and etiquette; hand gestures and body language; and tipping
- ☛ Up-to-date advice on dealing with monumental changes in Russia, Germany, Eastern Europe, and other locales
- ☛ A special quick reference guide to customs and mores in 96 countries

English has become the global language used in international trade, science, technology, and travel. In this essential guide, Roger E. Axtell shows you how to use English successfully in any business or social context—and how to avoid making embarrassing or misleading statements to people who are trying to understand you. Inside you'll find:

- ☛ Dozens of amusing anecdotes that illustrate the potential trials and pitfalls of using American English around the world
- ☛ The important differences between American English and the English spoken in Great Britain, Canada, Australia, and South Africa
- ☛ Helpful advice on using interpreters and translators

**Identifying and Harvesting Edible and Medicinal Plants in Wild (and Not So Wild) Places** shows readers how to find and prepare more than 500 different plants for nutrition and better health, including such common plants as mullein (a tea made from the leaves and flowers suppresses a cough), stinging nettle (steam the leaves and you have a tasty dish rich in iron), cattail (cooked stalks taste similar to corn and are rich in protein), and wild apricots (an infusion made with the leaves is good for stomachaches and digestive disorders).

More than 260 detailed line drawings help readers identify a wide range of plants — many of which are suited for cooking by following the more than thirty recipes included in this book. There are literally hundreds of plants readily available underfoot waiting to be harvested and used either as food or as a potential therapeutic. This book is both a field guide to nature's bounty and a source of intriguing information about the plants that surround us.
