Give the gift of **SCIENCE NEWS** this holiday season...

This holiday, share **SCIENCE NEWS** with your friends. They will appreciate the opportunity to learn about new scientific discoveries that can affect their lives, their jobs, their futures. And in this era of rapid development, they will especially appreciate the timely perspective **SCIENCE NEWS** gives to urgent issues involving science and society.

Why? Because **SCIENCE NEWS** is designed for people on the go. It reports key developments clearly, accurately, concisely — in about an hour's reading time per week. For someone with little spare time, **SCIENCE NEWS** provides a reliable summary of important news.

SCIENCE NEWS makes the ideal gift for busy executives, professionals, science teachers, students, and scientists in search of an overview of all major fields of science.

SPECIAL HOLIDAY SAVINGS!

Your first gift subscription of **SCIENCE NEWS** is \$49.50. Each additional 1-year subscription is only \$44.00. And you may include your own renewal or new subscription at this money-saving rate.

SEND YOUR GIFT ORDERS NOW!

Use the convenient postage-paid reply card opposite this message. Or, if someone else has already used it, fill in the order form below and mail it today.

- Send gift announcement card to recipients.
- Please enter or extend my **SCIENCE NEWS** subscription for one year at the lowest rate to which my total subscription order entitles me.
- I enclose \$ _____ Please bill me.

Foreign postage \$6.00 additional per year.

A highly readable account of one of the only taboo subjects left in our society

You're dead...now what? *Death to Dust: What Happens to Dead Bodies?* by Kenneth V. Iserson, M.D. is about the unseen after-death activities that go on within our living world. It presents answers to the questions everyone wants to know but will not ask. *What happens in embalming, cremation, cryogenic preservation, autopsies, organ donation, and funerals? What does the medical examiner really do? How about the more bizarre uses of corpses, such as cannibalism, use for secret rites, research and religious ceremonies?* Never before has there been such a comprehensive book on the subject – written for professional and layman alike. Each topic is discussed from the individual point of view as well as societal experiences, drawing from the medical sciences and the secretive world of the funeral industry. This book sheds light into dark corners of our society and proves that, once again, truth is stranger than fiction. 705 pp. HC
