NeuroFuzzy technologies map a neural net to a fuzzy logic system. This enables powerful neural net learning algorithms with fuzzy logic.

"Fuzzy sets...bring the reasoning used by computers closer to that used by people." — Lofti Zadeh

Imagine a technology so revolutionary that it helps computers make decisions like human beings! Masterminded by Professor Lofti Zadeh, fuzzy logic has already demonstrated an infinite number of applications for modeling real world problems. This thought-provoking 3-volume set, a \$126.50 value, is yours for just \$4.95 as your introduction to the Library of Science.

FUZZY LOGIC FOR THE MANAGEMENT OF UNCERTAINTY

Edited by Lofti Zadeh and Janusz Kacprzyk

The comprehensive guide to fuzzy logic research and applications, FUZZY LOGIC FOR THE MANAGEMENT OF UNCERTAINTY compiles essays from leading scientists in six categories: Issues in uncertainty management • Theory and implementations of fuzzy logic • Approximate reasoning • Knowledge representation and elicitation • Knowledge-based systems • Intelligent database management systems. The authors highlight nonmonotonic, intuitionistic, modifier varieties and other types of fuzzy logic — and provide broad coverage of fuzzy logic's role in neural networks, intelligent database management systems, and much more.
