The Weekly Newsmagazine of Science

Science Service Publication
Volume 149, No. 24, June 15, 1996

Donald R. Harless	Publisher
Julie Ann Miller	Editor
Blair Burns Potter	Managing Editor
Dan Skripkar	Production/Design Director
David Lindley	Associate Editor
Janet Raloff	Senior Editor Environment/Policy
Ron Cowen	Astronomy
Bruce Bower	Behavioral Sciences
Richard Lipkin	Chemistry/ Materials Science
Richard Monastersky	Earth Science
John Travis	Biology
Kathleen Fackelmann,	Biomedicine
Steve Sternberg	
Tina Adler	Life Sciences
Ivars Peterson	Mathematics/Physics
Erik Skindrud	Science Writer Intern
Damaris Christensen	Editorial Assistant
Cait Anthony	Books/Advertising

SCIENCE NEWS (ISSN 0036-8423) is published weekly on Saturday, except the last week in December, for \$49.50 for 1 year or \$88.00 for 2 years (foreign postage \$6.00 additional per year) by Science Service, Inc., 1719 N Street, N.W., Washington, D.C. 20036. Second-class postage paid at Washington, D.C., and additional mailing office. **POSTMASTER:** Send address changes to SCIENCE NEWS, P.O. Box 1925, Marion, Ohio 43305. Change of address: Four to six weeks' notice is required — old and new addresses, including zip codes, must be provided. Copyright © 1996 by Science Service, Inc. Title registered as trademark U.S. and Canadian Patent Offices. Printed in U.S.A. on recycled paper. ♻️
Republication of any portion of SCIENCE NEWS without written permission of the publisher is prohibited.

This Week

- 372 Gene for Most Common Cancer Found
- 372 Running gaze catches on with fielders
- 373 Uncertainties greet latest planet finds
- 373 The taste of fat may pose a heart risk
- 374 Short circuit severed satellite tether
- 374 Catching the sun to generate electricity
- 375 Penetrating the secrets of tuberculosis
- 375 A plan for the struggling Sierra Nevada

Research Notes

- 381 Behavior
- 381 Biology

Articles

- 376 The Sounds of Crumpling
Cover: Twisting a crumpled sheet of mylar or paper generates clicking and popping sounds, as seen in a recording of the intensity of sound pulses emitted by the sheet. These experiments, together with computer simulations, provide new insights into crumpling phenomena, whether in paper sheets, car wrecks, or biological membranes. (Graph: Kramer *et al.*/University of Chicago)
- 379 Bleaching Power
- 382 Hypertension's Lead Connection

Departments

- 370 Books
- 371 Letters

Science Service, which publishes SCIENCE NEWS, is a nonprofit corporation founded in 1921 to increase the public understanding of science. Through its youth programs, it administers the International Science and Engineering Fair and the Science Talent Search for the Westinghouse science scholarships.

Board of Trustees — *Chairman*, Dudley Herschbach; *Vice Chairman*, Gerald F. Tape; *Secretary*, David A. Goslin; *Treasurer*, Willis Harlow Shapley; Joseph W. Berg Jr.; Robert W. Fri; J. David Hann; Shirley M. Malcom; C. Bradley Moore; Ben Patrusky; H. Guyford Stever; Sanford J. Ungar; Deborah P. Wolfe.

Honorary Trustees — *Chairman Emeritus*, Glenn T. Seaborg; Edward Bliss Jr.; Bowen C. Dees; Elena O. Nightingale; O.W. Riegel; John Troan.

Letters

More factors affecting empathy?

I believe that William Ickes is on the right track in his empathy studies, but why aren't environment and age of subject covered ("Catching Mind Readers in the Act," SN: 3/23/96, p. 190)?

The eldest child of each sex is taught more by the parents and generally has more exposure to opportunity and responsibility—a basic difference from younger siblings.

At differing ages, each individual has differing sets of primary interests, which may compete with efforts toward empathic understanding.

Richard Carlson
Seattle, Wash.

Folate follies

I find "Folate supplements needed but allergic" (SN: 3/30/96, p. 198) deeply disturbing.

First of all, injection is an inappropriate route for the administration of vitamins: Properly, they should be ingested. This allows concentrations to build to a peak and slowly subside, whereas injection amounts to a sudden insult and could conceivably result in death.

Second, why administer folate to the entire population merely because some women have been so brainwashed by the Food and Drug Administration that they do not routinely take multiple vitamins?

Third, the minuscule recommended daily allowance of folate is so wrongheaded as to be ridiculous.

Finally, one allergic reaction to a wrongly

administered vitamin does not make it allergic; it merely makes the victim's physician an inadvertent poisoner.

Edward G. Robles Jr.
Franklin, N.C.

Breast surgery: Not a last resort

Virginia Ernster's comment that "We only care about cancer if it invades and becomes clinically significant or life-threatening" ("One diagnosis, too many mastectomies," SN: 3/30/96, p. 196) is an insult to women who have detected ductal carcinoma in situ at a very early stage and have taken appropriate steps to remove the cancer from their bodies. The diagnosis of any cancer, even very early stage cancer, is devastating, but not to treat it aggressively is unthinkable.

I do not agree that a mastectomy should be a last resort; it should be offered as an equal option for treatment.

Marcia R. Oder
Export, Pa.

CORRECTION

The surface area of the leaf portions pictured in "Mapping out a leaf's mountains and valleys" (SN: 5/25/96, p. 325) is 1 centimeter square.
