

Explore the frontiers of theoretical physics...

GET THE 5-VOLUME QUANTUM COSMOLOGY LIBRARY for only \$5.95 as your introduction to the **Library of Science**

You simply agree to buy three more books — at a significant savings — within the next 12 months.

What can quantum mechanics tell us about the universe? Take a thought-provoking tour of theoretical physics with this 5-volume set. A \$162.40 value, it's yours for just \$5.95 as your introduction to the Library of Science.

Principles of Physical Cosmology

P.J.E. Peebles. A complete reference to cosmology — including general relativity theory, the expanding universe and alternative cosmologies, as well as elements of "modern" cosmology such as Dark Matter and Wall, String and Spherical Solutions.

Publisher's Price: \$59.50

The Conscious Universe Part and Whole in Modern Physical Theory

Menos Kafatos and Robert Nadeau. Is the universe a conscious system? Probe the relationship between physical theory and reality. Weigh its impact on the search for truth in both science and the human experience.

Publisher's Price: \$19.95

Quantum Mechanics and Experience

David Z. Albert Explore the central paradoxes of quantum mechanics — including superposition, multiple-universe theories and the most fundamental challenge of all, the measurement problem. "Wholly original, engaging and provocative" — Jeffrey Bub.

Publisher's Price: \$27.95

Wrinkles in Time

George Smoot & Keay Davidson. Steven Hawking called it, "The scientific discovery of the century, if not all time." Here's the thrilling, first-hand account of the discovery of ripples in the fabric of space-time.

Publisher's Price: \$25.00

Black Holes & Time Warps Einstein's Outrageous Legacy

Kip S. Thorne. What cosmological possibilities bequeathed by general relativity theory were so bizarre that even Einstein rejected them? Kip Thorne looks at our universe through an Einsteinian lens to examine such phenomena as black holes, singularities, gravitational waves, even time travel.

MEMBERSHIP BENEFITS In addition to getting the QUANTUM COSMOLOGY LIBRARY for only \$5.95 when you join, you keep saving substantially with discounts of up to 50% off the publishers' prices on books you choose to purchase. • Also, you can participate in our Bonus Book Plan after purchasing just one regular selection at the discounted member's price. • Moreover, our books are always identical to the publishers' editions. You'll never receive an "economy edition" with inferior paper and bindings from us. • At 3-4 week intervals (15 times per year), you will receive the Library of Science News, describing the coming Main Selection and Alternate Selections, together with a dated reply card. • In addition, up to three times a year, you may receive offers of Special Selections which will be made available to a group of select members. • If you want the Main Selection, do nothing, and it will be sent to you automatically. • If you prefer another selection, or no book at all, simply indicate your choice on the card and return it by the date specified. • You will have at least 10 days to decide. If, because of late mail delivery of the News, you should receive a book you do not want, we guarantee return postage.
