Mysterious Mammals

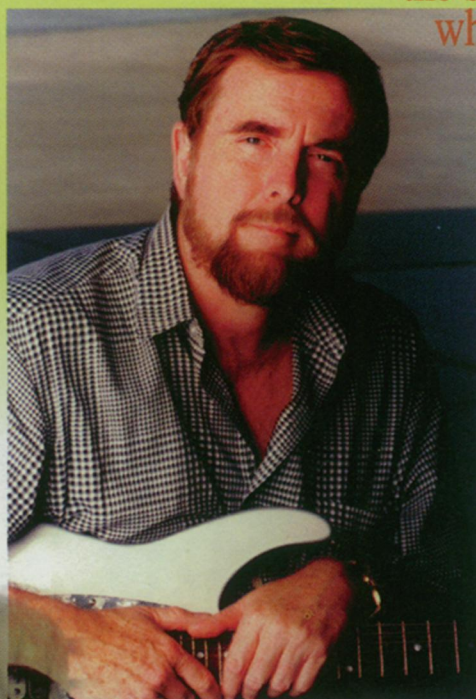

WHAT DO THESE PEOPLE HAVE IN COMMON?

“Science competitions have opened more doors than I could have ever imagined.”

TRACY PHILLIPS
Student, ISEF 1995
1st Place Grand Award Winner and Westinghouse Science Talent Search Finalist for “wallet for the blind,” a portable electronic currency vocalizer.

“Without the science fairs, who knows where I’d be?”

HARTLEY PEAVEY
Entrepreneur and civic leader, Founder/CEO Peavey Electronics Corp., manufacturer of sound equipment with 2,400 employees in 33 locations worldwide.

BOTH are innovators and former science fair participants. **BOTH** recognize the value of science education. **BOTH** read **SCIENCE NEWS**.

For over 70 years, Science Service has championed the advancement of science education. We publish **SCIENCE NEWS** to further public understanding of science. We sponsor the two most highly regarded science competitions, the INTERNATIONAL SCIENCE AND ENGINEERING FAIR (ISEF) and the WESTINGHOUSE SCIENCE TALENT SEARCH (STS). These help cultivate the minds of young scientists and inventors like Tracy and Hartley.

Our good work reaches over 1 million people annually. To support our educational, scholarship, internship, and outreach programs, please forward your tax-deductible contribution to Science Service, 1719 N Street, NW, Washington, DC 20036. Or call us at **202-872-5147** to make a contribution using your VISA or MasterCard.

Bottomless canyons, fierce rivers, sky-scraping mountains, and ancient peoples populate the United States desert Southwest. In *Four Corners*, Kenneth Brown embarks upon a fascinating odyssey through this mysterious and beautiful region, writing about the peoples who rose and fell there, the subtle geological forces that sculpted the landscape, and the delicate yet enduring ecosystem that sustains life across the often brutal terrain.

With its broad desert valleys, where cooling rivers of lava left floors of solid rock, the Colorado Plateau and Four Corners region of Colorado, Utah, Arizona, and New Mexico is a geological window into the earth's history. And the history of the peoples who roamed the Southwest is as diverse and colorful as the landscape itself. Originally populated by bands of hunters and gatherers, the region was later settled by the famous cliff-dwelling Anasazi, and still later by the Spaniards, Mormons, and other pioneers.

Four Corners is a compelling exploration of one of the world's great treasures.

Why do you dream? Can you really jog your memory? How do you think? Can you improve your intelligence?

The answers to these and many more questions are right above your nose. They're also in this book!

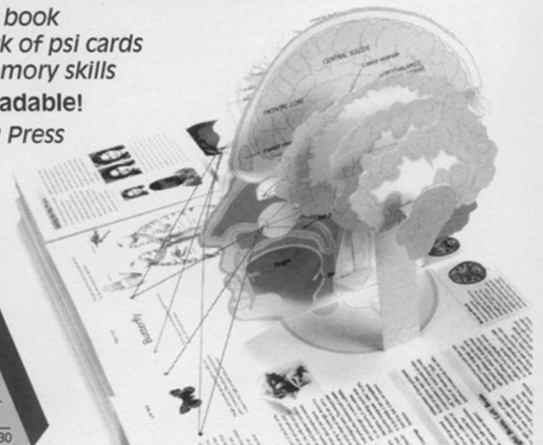

Filled with intricate pop-ups, instructive pullouts, optical illustrations, and mind-boggling quizzes, THE BRAIN PACK explores the fascinating facts and myriad mysteries inside your head. Evolutionary trends, scientific studies, theories of phrenology and neuropsychology, and even your own experiences contribute to this remarkable and entertaining exploration.

With THE BRAIN PACK you can

- Examine a three-dimensional model of your brain to see how and where information from the five senses is received and processed
- Discover how sex hormones affect the organization of the brain and influence your behavior
- Trace the development of the brain, in full-color detail, from conception to infancy and through adolescence to adulthood
- Take a 15-minute recorded tour of the brain with the audiocassette included in the tray at the back of the book
- Test your psychic abilities with a deck of psi cards
- Evaluate your IQ and short-term-memory skills

Never before has the mind been so readable!
