

Science Service Publication  
Volume 151, No. 13, March 29, 1997

Thomas Peter Bennett	Publisher
Julie Ann Miller	Editor
Blair Burns Potter	Managing Editor
Dan Skripkar	Production/Design Director
David Lindley	Associate Editor
Janet Raloff	Senior Editor
Ivars Peterson	Environment/Policy Online Editor
Bruce Bower	Mathematics/Physics Behavioral Sciences
Richard Monastersky	Internship Coordinator Earth Science Biomedicine
Kathleen Fackelmann, Steve Sternberg	
Ron Cowen	Astronomy
Tina Adler, Christine Mlot	Life Sciences
John Travis	Biology
Corinna Wu	Chemistry/Materials Science
Paul Smaglik	Science Writer Intern
Meghan Mitchell	Editorial Assistant
Cait Anthony	Books/Advertising
Donald R. Harless	Business Manager

SCIENCE NEWS (ISSN 0036-8423) is published weekly on Saturday, except the last week in December, for \$49.50 for 1 year or \$88.00 for 2 years (foreign postage \$6.00 additional per year) by Science Service, 1719 N Street, N.W., Washington, D.C. 20036. Preferred Periodicals postage paid at Washington, D.C., and additional mailing office. POSTMASTER: Send address changes to SCIENCE NEWS, P.O. Box 1925, Marion, Ohio 43305. Change of address: Four to six weeks' notice is required — old and new addresses, including zip codes, must be provided. Copyright © 1997 by Science Service. Title registered as trademark U.S. and Canadian Patent Offices. Printed in U.S.A. on recycled paper. ♻️ Reproduction of any portion of SCIENCE NEWS without written permission of the publisher is prohibited.

SCIENCE NEWS ONLINE <http://www.sciencenews.org>

## This Week

- 188 First Peek at DNA Transcription
- 188 Eye pigments may depend on one amino acid
- 189 Conscience grows on temperamental ground
- 189 Swapping insulin syringes for tiny beads
- 190 Meteorite still holds inklings of life
- 190 New glucose test on the way for diabetes
- 191 Newfound gene linked to several cancers
- 191 Florida manatees' future: Grim or golden?

## Research Notes

- 194 Astronomy
- 194 Biomedicine
- 196 Earth Science
- 196 Physics

## Articles

- 192 Deep Dwellers

Cover: While scientists once considered the deep crust a lifeless place, microbiologists are now discovering a rich assortment of microbes locked in rock several kilometers underground. The red bacterial cells in this micrograph come from basalt formations in Washington State. They live on a diet of basalt and water, harnessing energy from hydrogen released by the rock. (Micrograph: T. Stevens/Pacific Northwest National Lab.)

- 198 Forbidden Flavors

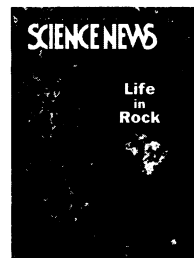

## Departments

- 187 Letters
- 197 Books

Science Service is a nonprofit corporation founded in 1921 to increase the public understanding of science. It publishes SCIENCE NEWS and administers the International Science and Engineering Fair and the Science Talent Search.

Board of Trustees — *Chairman*, Dudley Herschbach; *Vice Chairman*, Gerald F. Tape; *Secretary*, David A. Goslin; *Treasurer*, Willis Harlow Shapley; Joseph W. Berg Jr.; Robert W. Fri; J. David Hann; Shirley M. Malcom; Eve L. Menger; C. Bradley Moore; Ben Patrusky; H. Guyford Stever; Sanford J. Ungar; Deborah P. Wolfe; *Chairman Emeritus*, Glenn T. Seaborg; *Honorary Trustees*, Edward Bliss Jr.; Bowen C. Dees; Elena O. Nightingale; O.W. Riegel; John Troan.

Officers—*President*, Thomas Peter Bennett; *Vice President and Business Manager*, Donald R. Harless.

## Letters

### Relocated ruins?

I enjoyed and was heartened by the endeavors to protect our marble and limestone heritage, as addressed in "Consolidating the Stone" (SN: 1/25/97, p. 56). I was somewhat baffled, however, by the photo that purports to show the Mundo Maya Ruins in Mexico City.

Did the researchers relocate both the Temple of the Warriors and the Temple of Kukulcan, which normally reside at Chichén Itzá, to Mexico City to see how Yucatán limestone weathers in a different climate? Excellent job of landscape reconstruction as well.

Bill Preston  
San Luis Obispo, Calif.

As you—and several other readers—point out, the ruins are not in Mexico City. —The Editors

### Baseline: Normal

"1996: Year of warmth and weather reversals" (SN: 1/18/87, p. 38) includes a map and

caption that, taken together, boggle the mind. The map purports to show that the near-polar regions are warmer than the area between the tropics.

Surely, either the map is wrong or the caption is.

Russell Ward  
Clover, S.C.

The caption should have read: Surface temperature anomalies, with cooler-than-normal regions in blue and warmer-than-normal regions in red. — R. Monastersky

## CLARIFICATION

J. Koudy Williams of the Bowman Gray School of Medicine wishes to clarify a statement in "Hormone Therapy: Issues of the Heart" (SN: 3/8/97, p. 140). In terms of protection from heart disease, he says, the widely prescribed progesterone MPA "appears to lessen the beneficial effects of estrogen."

Seymour Cray is erroneously spelled Clay in the Books listing (SN: 3/1/97, p. S9).

## Recent Awards

Three members of the SCIENCE NEWS staff have been honored recently for journalistic achievement.

David Lindley, associate editor, won a Phi Beta Kappa award for outstanding contributions to humanistic learning. He was recognized for *Where Does the Weirdness Go? Why Quantum Mechanics Is Strange but Not As Strange As You Think*, published last year by Basic Books.

John Travis, who writes about biology, received honorable mention in the Evert Clark Award for Science Journalism. The award was announced at the meeting last month in Seattle of the American Association for the Advancement of Science.

Julie Ann Miller, editor, was selected to receive the University of Wisconsin's Award for Distinguished Service to Journalism and Mass Communication. The award, which recognizes outstanding career accomplishment, will be presented in Madison next month.
