SCIENCE DISCOVERY!

Mind Boggling Optic Mirage® Creates Baffling Illusions That Defy Explanation.

Mirage will become the most baffling, attention-getting conversation piece you'll ever own. Each mirror ray display is a scientific phenomenon called a three dimensional real image. For years, students often first heard of them in science labs, but few actually saw one. Observe the path of light rays illustrated as they construct a three-dimensional image of this fascinating optic mirage disc... there is nothing there. The object actually is below, displaying an unusual parabolic optical effect. Even when photographed, the object appears to be on top. **Acrylic Mirror Optic Mirage®, 9" diameter PG72,381 \$43.00**
