Large frame \$24.95 CircuitFramL Small frame \$18.95 CircuitFramS Cardcase \$24.50 CircCardCase

## THE INVENTION THAT **CHANGED THE WORLD** is

the great and largely untold story of the colorful scientists who created the microwave radar systems that not only helped the Allies win World War II but set off a veritable explosion of technological advances. Developed in the top-secret radiation lab on the campus of MIT, microwave radars eventually helped destroy Japanese warships and enabled Allied bombers to "see" through cloud cover over Germany and Japan. Radar veterans were also instrumental in creating the field of radio astronomy and discovering nuclear magnetic resonance, the transistor, and the maser.

1996, 575 pages, 61/4" x 91/2", hardcover, \$30.00 InvenChWrldH

**Fishing** 

Darwin's

Paul Quinnett

Bass

**PAVLOV'S TROUT** The Incompleat Psychology of Everyday

An angler all his life and a psychologist for the past 25 fishing seasons, Paul Quinnett examines the mysteries of sport fishing through the microscope of modern psychology. Anyone who has enjoyed the pleasures of fishing—or merely wondered at the almost primal appeal of the sport—will find Pavlov's Trout both illuminating

and entertaining. 1994, 211 pages, 51/8" x 81/8", paperback

\$12.95 PavlovsTrout

# DARWIN'S BASS

# The Evolutionary Psychology of Fishing Man

You won't find him listed in the evolutionary cast of characters alongside Lucy or Cro-Magnon Man, but long ago there was also Fishing Man. Loaded with insight about what lures people to the water, Darwin's Bass delves into the mind of the ancient fisherman to help explain the attraction modern humans feel to the sport.

1996, 254 pages, 5½" x 8½", paperback

\$14.95 DarwinsBass

\$24.95 HierCufflink

THE CASE FOR MARS

# The Plan to Settle the Red Planet and Why We Must

Robert Zubrin has crafted a daring new blueprint, Mars Direct, that experts are hailing as the most visionary step toward expanding human activity in space. Presented here with illustrations and photographs, Zubrin's plan calls for a travel-light-and-live-off-the-land approach. He explains how we can use technology to send people to Mars within 10 years. actually produce fuel and oxygen on the planet's surface with Martian natural resources, and how we can one day "terraform" Mars.

1996, 328 pages, 61/4" x 91/2" hardcover, \$25.00 CaseMarsH
