The Weekly Newsmagazine of Science

Science Service Publication  
Volume 151, No. 23, June 7, 1997

Thomas Peter Bennett	Publisher
Julie Ann Miller	Editor
Blair Burns Potter	Managing Editor
Dan Skripkar	Production/Design Director
David Lindley	Associate Editor
Janet Raloff	Senior Editor
Ivrs Peterson	Environment/Policy Online Editor
Bruce Bower	Mathematics/Physics Behavioral Sciences
Richard Monastersky	Internship Coordinator
Kathleen Fackelmann, Nathan Seppa	Earth Science Biomedicine
Ron Cowen	Astronomy
Tina Adler, Christine Mlot	Life Sciences
John Travis	Biology
Corinna Wu	Chemistry/Materials Science
Meghan Mitchell	Editorial Assistant
Cait Anthony	Books/Advertising
Donald R. Harless	Business Manager

SCIENCE NEWS (ISSN 0036-8423) is published weekly on Saturday, except the last week in December, for \$49.50 for 1 year or \$88.00 for 2 years (foreign postage \$6.00 additional per year) by Science Service, 1719 N Street, N.W., Washington, D.C. 20036. Preferred Periodicals postage paid at Washington, D.C., and additional mailing office. POSTMASTER: Send address changes to SCIENCE NEWS, P.O. Box 1925, Marion, Ohio 43305. Change of address: Four to six weeks' notice is required — old and new addresses, including zip codes, must be provided. Copyright © 1997 by Science Service. Title registered as trademark U.S. and Canadian Patent Offices. Printed in U.S.A. on recycled paper. ♻️ Reproduction of any portion of SCIENCE NEWS without written permission of the publisher is prohibited.

## This Week

- 348 A New Gap in the Antibiotic Arsenal
- 348 Patients savor this brain disorder
- 349 No bones about it: Gene vital to skeleton
- 349 Elderly intellect may owe a lot to genes
- 350 Mud volcano stews in chilly Arctic waters
- 350 Can houseflies spread the ulcer bacterium?
- 351 Astronomers make magnetic map of a star
- 351 Pinning down a superconductivity theory

## Research Notes

- 352 Astronomy
- 352 Behavior
- 359 Biomedicine
- 359 Earth Science

## Articles

- 354 From Soup to Us

Cover: A fraction of a second after its birth, the universe may have ballooned to cosmic proportions. Astronomers are now on the brink of determining whether such a growth spurt, known as inflation, actually took place and whether subatomic ripples in the smooth, infant cosmos gave rise to today's lumpy collection of galaxies and galaxy clusters. - 356 Null Science

## Departments

- 346 Books
- 347 Letters

Science Service is a nonprofit corporation founded in 1921 to increase the public understanding of science. It publishes SCIENCE NEWS and administers the International Science and Engineering Fair and the Science Talent Search.

Board of Trustees — *Chairman*, Dudley Herschbach; *Vice Chairman*, Gerald F. Tape; *Secretary*, David A. Goslin; *Treasurer*, Willis Harlow Shapley; Joseph W. Berg Jr.; Robert W. Fri; J. David Hann; Shirley M. Malcom; Eve L. Menger; C. Bradley Moore; Ben Patrusky; H. Guyford Stever; Sanford J. Ungar; Deborah P. Wolfe; *Chairman Emeritus*, Glenn T. Seaborg; *Honorary Trustees*, Edward Bliss Jr.; Bowen C. Dees; Elena O. Nightingale; O.W. Riegel; John Troan.

Officers—*President*, Thomas Peter Bennett; *Vice President and Business Manager*, Donald R. Harless.

## Letters

### Handed hygiene

The effect of handedness observed in Neandertal teeth ("Neandertal teeth get a hand," SN: 4/19/97, p. 240) has a modern counterpart.

Right-handed individuals tend to perform better oral hygiene on their left side; however, left-side teeth tend to suffer greater lateral surface abrasion as a result. These observations are consistent with studies that have documented a higher incidence of periodontal disease on the right teeth of right-handed individuals.

Paul J. Heins  
*Professor of Periodontology  
University of Florida  
Gainesville, Fla.*

### Questionable research ethics

"Release of Study Ends Drug Fracas" (SN: 4/19/97, p. 236) tells us that Flint Laboratories (later Boots) both paid \$250,000 for the

Dong team to study the drug Synthroid "and signed [the researchers] to a contract that barred them from publishing results without permission." The substantial theme of the story, however, is one of academic freedom of speech versus corporate greed, and the author leaves us in no doubt that the academic researchers are the good guys and the corporate sponsors are the bad guys.

I was appalled by the notion of the Dong team's taking Flint's money and then grossly violating their contract. Unless there is more to the story, clearly it is the Dong team, not the "profit-minded corporate executives," who are guilty of bad ethics.

Send communications to:  
Editor, Science News  
1719 N Street, N.W.  
Washington, D.C. 20036  
or: [scinews@sciserv.org](mailto:scinews@sciserv.org)  
All letters subject to editing.

Anyone on the receiving end of corporate largess has to be aware that the company is not interested in publishing bad things about itself. Thus the researchers have to anticipate that, if their results are unfavorable to their sponsors' reputation, permission to publish will be withheld. Yet the Dong team signed the contract, then violated it.

Laurence N. Wesson  
*Blue Bell, Pa.*

In 1979 and 1980 I was quality assurance manager for the company that manufactured Synthroid. Synthroid was then and still is a prescription drug that is regulated by the Food and Drug Administration.

Synthroid may have been exempt from the FDA's New Drug Approval process when it was first marketed (which was way before my time with the company), but it has never been exempt from regulation.

Lowell A. Howard  
*Merrill, Wis.*
