Big Puzzles for Little Hands

These giant floor puzzles capture the immensity of the subjects they depict. They fascinate children, who can create scenes and creatures that rival their own size. Small children find the giant pieces easy to handle and match, helping them to develop their motor and visual discrimination skills as well as teaching them the patience necessary to complete a task.

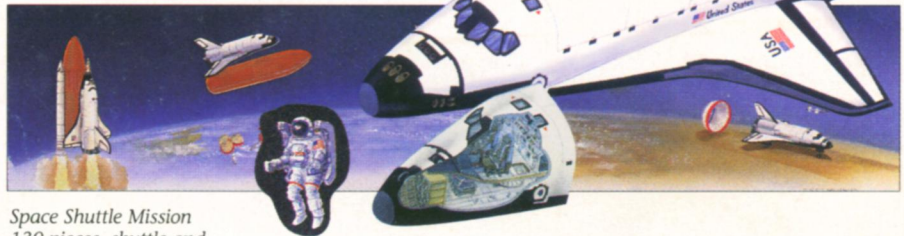

The **Rain Forest Frogs**, **Seashore**, **World Map**, and **Rain Forest Layers** puzzles include an identification key. The **World Map** puzzle also includes 21 geography cards that match locations on the puzzle marked with icons. The **Space Shuttle Mission** is three puzzles in one: the space shuttle, 53 pieces; interchangeable nose cone, 16 pieces; and a diagram puzzle outlining the steps of a launch, 51 pieces. Ten astronaut and satellite pieces also come with the **Space Shuttle Mission**.
