57th Westinghouse Science Talent Search

\$205,000 in scholarships will be awarded to high school seniors in the 57th Westinghouse Science Talent Search for research projects in science, mathematics and engineering

One	\$40,000 scholarship	(\$10,000 per year for 4 years)
One	\$30,000 scholarship	(\$7,500 per year for 4 years)
One	\$20,000 scholarship	(\$5,000 per year for 4 years)
Three	\$15,000 scholarships	(\$3,750 per year for 4 years)
Four	\$10,000 scholarships	(\$2,500 per year for 4 years)
Thirty	\$1,000 scholarships	(payable upon matriculation)

Basic Requirements—Entrants must be high school seniors during the 1997-98 school year. Primary emphasis is placed on a written report of an independent research project in the physical sciences, behavioral and social sciences, engineering, mathematics, or biological sciences (excluding live vertebrate experimentation). The research project must be the work of a single individual. Group projects are not eligible. An Entry Form, designed to elicit evidence of creativity and interest in science, is also required, along with an official high school transcript, available standardized test scores, and statements and recommendations from teachers and/or supervising scientists.

Important Note—Sons and daughters of Science Service employees or Science Talent Search evaluators and judges are not eligible for competition.

Winners Selection—Three hundred Semifinalists are selected from entries received (usually about 1,800) after careful evaluation by a team of 40 evaluators and judges specializing in a variety of scientific disciplines. Forty Finalists are then selected from the Semifinalists and invited to Washington, DC in March 1998, for final judging by a board of 10 distinguished scientists.

The Rewards—The 300 Semifinalists benefit in the following ways: (1) recommendations to colleges and universities for admission and financial assistance, (2) certificates of achievement for students and teachers, (3) a sense of accomplishment and a measure of self-esteem that comes from finishing a difficult assignment. The 40 Finalists, selected from the Semifinalists, are also awarded a trip to Washington, DC, for the six-day, all-expense-paid Science Talent Institute for final judging and a chance to share \$205,000 in scholarships.

Sponsors—Since its inception in 1942, the Science Talent Search has been funded by Westinghouse Electric Corporation and administered by Science Service, a Washington, DC-based nonprofit organization.

Deadline—

November 24, 1997

Entries for the 57th Westinghouse Science Talent Search (1997-98 school year)

Entries must be received by 6:00 p.m. on Monday, November 24, 1997, at Science Service, 1719 N Street, NW Washington, DC 20036. Late entries will be accepted ONLY if the judging process has not been completed and if (1) entries were metered in a U.S. Post Office by November 11, 1997, or (2) entries were sent by a carrier that guaranteed delivery in writing by the deadline. Entries may NOT be sent by telefax or E-mail.

We strongly recommend early entries to avoid delivery delays. NOTE: The U.S. Postal Service's Registered or Certified Mail is for tracking purposes only, and is NOT the same as Express Mail, which delivers overnight. Priority mail DOES NOT GUARANTEE IN WRITING delivery in two days.

*A 50-Year History of the
Westinghouse Science Talent Search*

Author Tom K. Phares provides a comprehensive history of the Westinghouse Science Talent Search from its inception in 1942. Entertaining prose leads you from the meeting of the two founders of the STS at the World's Fair in 1939 to the accomplishments of past winners—five of whom have gone on to become Nobel Laureates; to the dedicated individuals behind the winners; through the arduous judging and evaluation process; to the educational opportunities that open up to STS finalists. Also included as appendices in this informative review are a list of the finalists' names from 1942 to 1990, lists of major honors received by former winners, and a list of the 32 high schools that have produced the most winners. (Published by Westinghouse Electric Corporation, 1990; paperback; 122pp.)

Mind Boggling Optic Mirage® Creates Baffling Illusions That Defy Explanation.

Mirage will become the most baffling, attention-getting conversation piece you'll ever own. Each mirage you display is a scientific phenomenon called a three dimensional real image. For years, students often first heard of them in science labs, but few actually saw one. Observe the path of light rays illustrated as they construct a three-dimensional image of this fascinating optic mirage disc... **there is nothing there.** The object actually is below, displaying an anomalous, parabolic, optical effect. Even when photographed, the object appears to be on top.
