

It's Experimental!

Whether you are a parent or a schoolteacher looking for projects for your class, Janice VanCleave has a book of science experiments for you! VanCleave is a former science teacher and a captivating presenter.

Young children will discover the answers to lots of fun questions as you team up to play together and explore the wonder of our world. Each of 50 experiments includes illustrations, a list of easy-to-find materials, and simple, step-by-step instructions. Recommended for ages 4 to 7.

Science features chemistry and physics activities. Kids learn how planes fly, why lemons are sour, and why your shadow changes. 10 1/2" x 8 1/2", 122 pages, 1996, \$12.95. **Nature** illustrates how octopuses move and the world of cat vision, among other things. 10 1/2" x 8 1/2", 122 pages, 1997, \$12.95. Get both, only \$19.95.

Learn the answers to questions in biology, chemistry, physics, earth science, and astronomy through over 200 fun and wacky, safe and low-cost experiments that can be performed at home or in the classroom. Recommended for ages 8 to 12.

200 Experiments shows how to find out why people snore, how a submarine rises and submerges, and why cats have rough tongues. 8 1/2" x 10 1/4", 116 pages, 1993, \$12.95.

202 Experiments provides experiments to show how you can clear an oil slick, why milk curdles, and where a worm lives. 8 1/2" x 10 1/4", 120 pages, 1993, \$12.95. Buy both, only \$19.95.

Each of the many problems in these books is broken down into its purpose, a list of materials needed, step-by-step instructions, expected results, and an easy-to-understand explanation. Every activity has been tested and can be performed safely and inexpensively in the classroom, science fair, or home.

Human Body shows what makes the heart beat faster, how tightrope walkers keep their balance, why spinning fast makes you dizzy. 224 pages, 1995, \$11.95.

Earth Science features experiments illustrating sedimentary rock formations, solar eclipses, and waves. 232 pages, 1991, \$11.95.

In **Physics**, kids learn about gravity, electrons, and aerodynamics. 242 pages, 1991, \$11.95.

Math uses simple problems and activities to teach measurements, fractions, graphs, and problem solving. 216 pages, 1991, \$11.95. \$39.95 for a set of all four. All books 5 1/2" x 9", ages 8 to 12.

Having a hard time coming up with a good idea for the science fair? Need extra credit? These books can help! Each step-by-step guide explores 30 different topics and offers dozens of low-cost experiment ideas. Also, each includes charts, diagrams, and illustrations. Recommended for age 12 and up.

A+ Chemistry features experiments on polymers, crystals, and denaturing proteins. 6" x 9", 234 pages, 1993, \$12.95. **A+ Biology** features experiments on seed germination, chromatography, and operant conditioning. 6" x 9", 218 pages, 1993, \$12.95. Buy both books only \$19.95.

Science News Books
1719 N Street, NW, Washington, DC 20036

Please send me the book(s) marked below. I include a check payable to Science News Books for the price of the book(s) plus \$3.95 postage and handling for the first book. Add \$1.00 postage and handling for each additional book (maximum \$5.95 charge). Domestic orders only.
