Not all radios are created equal.

Bose® takes radio to a new level.

Most radios leave a lot to be desired—rich, lifelike sound, for instance. That's why Bose, the most respected name in sound, created the Bose Wave® radio. It literally redefines tabletop radio, so you can enjoy Bose quality sound almost anywhere. Like your living room, bedroom, kitchen, or office.

The Wave radio sounds as rich and lifelike as many full-sized stereo systems, despite its small size. In fact, many owners use their Wave radio as their primary stereo.

The key to the Wave radio's high-fidelity sound is our patented acoustic waveguide speaker technology. Just as a flute strengthens a breath of air to fill an entire concert hall, the waveguide produces room-filling sound from the Wave radio's small enclosure.

Popular Science was so impressed, they honored the Wave radio with a "Best of What's New" award.

Unique features make it very easy to use.

The Wave radio comes complete with a handy credit card-sized remote control, dual alarms, and six AM and six FM station preset buttons. (A combination of features you won't find with any other radio.)

You can even bring award-winning Bose sound to recorded music, TV programs, or movies by connecting the Wave radio to your CD or cassette player, TV, or VCR. And the Wave radio measures just 4 1/4" H x 14" W x 8 1/4" D, so it fits almost anywhere.

Popular Science called it "a sonic marvel," and gave it a prestigious "Best of What's New" award. *Business Week* named it a "Best New Product of 1994." What will you say when you hear the Bose Wave radio?

Call now and make six interest-free payments.

Engineered and manufactured in the United States, the Wave radio is available for \$349 directly from Bose.

So call 1-800-845-BOSE, ext. R6947, to learn more about our in-home trial and satisfaction guarantee. When you call, ask about our six-month installment payment plan. Or, if you prefer, return the coupon below.

If you love music, call today. Because you haven't truly heard radio until you've heard the Bose Wave radio.
