Look It Up!

Carefully reviewed to ensure their accuracy, clarity, and completeness, the McGraw-Hill Dictionaries put a wealth of essential information at your fingertips. Whether you're a professional, a student, a writer, or a general reader curious about science, these comprehensive resources can enhance your understanding by describing concepts and defining words you need to know. Each dictionary includes hundreds of synonyms, acronyms, and abbreviations, identifies the fields in which a term is used, provides pronunciations for all terms, and contains an appendix of useful data and information.

- from McGraw-Hill

DICTIONARY

ASTRONOMY

All books McGraw Hill, 1997, 5%" x 81/4", paperback

Astronomy: 3,400 up-to-date entries fully describe planets, stars, constellations, galaxies, comets, asteroids, and nebulae, as well as astrophysics and aerospace engineering. 246 pages, \$12.95

Bioscience: 17,200 entries cover anatomy, biochemistry, biology, biophysics, physiology, cell biology, ecology, genetics, immunology, zoology, virology, evolution, molecular biology, systematics, paleontology, and botany. 511 pages, \$17.95

Chemistry: 8,500 entries cover organic chemistry, inorganic chemistry, physical chemistry, analytical chemistry, and spectroscopy. 454 pages, \$16.95

Earth Science: 10,400 entries span geology, geography, geodesy, geophysics, hydrology, oceanography, and meteorology. 468 pages, \$17.95

Engineering: 16,700 up-to-date entries fully define all fields, including chemical, civil, design, industrial, mechanical, and systems engineering; building construction; and mechanics and thermodynamics. 582 pages, \$17.95

Geology & Mineralogy: 8,700 terms include those central to physical, historical, and marine geology; plate tectonics; petrology; sedimentology; mineralogy; and stratigraphy. 346 pages, \$16.95

Mathematics: 4,000 up-to-date entries define the language of mathematics and cover all fields of pure and applied mathematics, including arithmetic, algebra, geometry, trigonometry, calculus, logic, and topology. 306 pages, \$12.95

Physics: 9,200 entries define terms relevant to acoustics, optics, atomic physics, particle physics, quantum mechanics, relativity, solid-state physics, and thermodynamics. 498 pages, \$16.95
