MAKING SENSE OF ILLNESS

SCIENCE, SOCIETY, AND DISEASE

ROBERT A. ARONOWITZ, M.D.

Making Sense of Illness

Science, Society, and Disease

Robert A. Aronowitz, M.D.

This is a fascinating investigation into the social and clinical factors that determine what constitutes a "legitimate" illness in the twentieth century by examining six case studies of diseases that have emerged within the past fifty years.

Cambridge Studies in the History of Medicine

Our Cosmic Origins

From the Big Bang to the Emergence of Life and Intelligence

Armand H. Delsemme

"I know of no other book that covers in such detail for a popular audience the grand sweep of cosmic evolution from the Big Bang to homo sapiens."

—Steven J. Dick, US Naval Observatory

This book traces the rich and wonderful history of the Universe, from the Big Bang to the creation of atoms and molecules, from the formation of stars and planets to the emergence of life on Earth.

1998 320 pp.
62038-4 Hardback \$24.95

The Cambridge Encyclopedia of Human Paleopathology

Arthur C. Aufderheide and Conrado Rodríguez-Martín

This comprehensive volume includes all conditions producing effects recognizable with the unaided eye. Detailed lesion descriptions and over 300 photographs and diagrams facilitate disease recognition and each condition is placed in context with discussion of its history, antiquity, etiology, epidemiology, geography and natural history.

1998 460 pp.
55203-6 Hardback \$100.00

The River of Time

Igor D. Novikov

Novikov describes how the thinkers throughout history have defined time and how these discoveries demonstrate that we may influence time's flow. He details the development of our views on time, from classical Greece to the modern day.

1998 260 pp.
46177-4 Hardback about \$34.95
46737-3 Paperback \$14.95

After the First Three Minutes

The Story of our Universe

T. Padmanabhan

Unlike other popular books on cosmology, *After the First Three Minutes* does not gloss over details, or shy away from explaining the underlying concepts. Instead, with a lucid and informal style, the author introduces all the relevant background and then carefully pieces together an engaging story of the evolution of our Universe.

1998 228 pp.
62039-2 Hardback \$59.95
62972-1 Paperback \$19.95

Evolution

Society, Science, and the Universe

A.C. Fabian, Editor

Contributors such as Stephen Jay Gould, Freeman Dyson, and Martin Rees address the mysteries of evolution by considering parallels from all levels of life. From the evolution of the embryo to the evolution of a star, common threads emerge to tell a fascinating story with surprising implications.

The Darwin College Lectures
1998 186 pp.
57208-8 Hardback \$22.95

The Cambridge Encyclopedia of Human Growth and Development

Stanley J. Ulijaszek, Michael A. Preece, and Francis E. Johnston, Editors

This is a comprehensive but accessible account of the current understanding of the factors affecting human growth and development. Over 120 internationally renowned experts have contributed to the book.

1998 512 pp.
56046-2 Hardback \$95.00

Now in paperback...

Evolving the Mind

On the Nature of Matter and the Origin of Consciousness

A. G. Cairns-Smith

"...I have never encountered a clearer or more vivid account of the spectacular ingenuity of cellular design and operation..."

—Daniel C. Dennett, *Nature*

The next great revolution in science will undoubtedly be the emergence of a useful theory of consciousness. *Evolving the Mind* broaches both of these themes, covering how ideas about the mind evolved in science and how the mind itself evolved in Nature.

1998 336 pp.
63755-4 Paperback \$15.95

Prisons of Light—Black Holes

Kitty Ferguson

"The reader...will be amply rewarded not only with knowledge, but also with the humor, fantasy, poetry and awe Ferguson brings to the subject."

—Publisher's Weekly, starred review

In this jargon-free review of one of the most fascinating topics in modern science, acclaimed science writer Kitty Ferguson examines the discovery of black holes, their nature, and what they can teach us about the mysteries of the universe.

1998 180 pp.
62571-8 Paperback \$14.95

Improving Nature?

The Science and Ethics of Genetic Engineering

Michael Reiss and Roger Straughan

"...an excellent introduction to the topic."

—Library Journal

The authors of this timely book, a biologist and a philosopher, combine their considerable expertise to examine the implications of genetic engineering for the future of our everyday lives.

1998 304 pp.
63754-6 Paperback \$15.95
