Soy's Recipe for Health

Cells & Genes

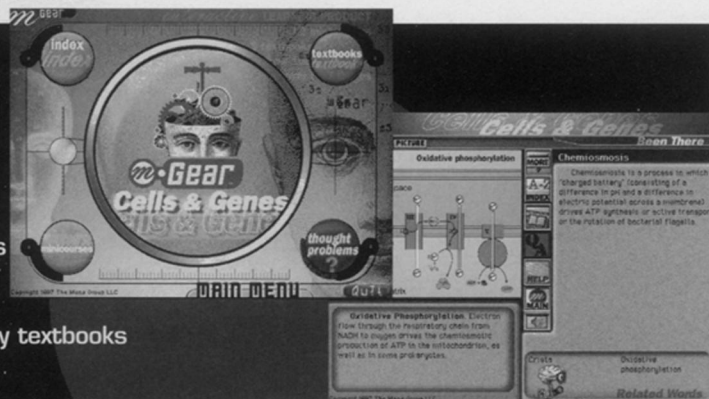

Order by phone for faster service!

1-800-266-5766 ext. 1494

(Visa, MasterCard, or American Express)

An Interactive CD-ROM Featuring:

- over 1,000 topics
- problem sets with hints and answers
- quizzes with more than 400 questions
- completely interactive hypertext
- over 600 illustrations and electron micrographs
- more than 100 entries with one or more animations
- exceptional video microscopy from Jeremy Pickett-Heaps, Mark Cooper, and others
- chapter reviews keyed to leading introductory biology textbooks
- audio pronunciation guide for more than 300 terms
- 17 minicourses on topics from mitosis to the flow of genetic information

SYSTEM REQUIREMENTS

For the Mac:

68040 processor running System 7.0 or better;
16 MB; 4X or better CD-ROM drive; color monitor
displaying 8-bit at 640 x 480 pixels resolution
(16- or 24-bit recommended).

For PC/Windows:

486 processor (Pentium or better recommended)
running Microsoft Windows 3.1 or Windows 95;
16 MB; 4X or better CD-ROM drive; Super VGA
monitor; sound card recommended.

Whatever their virtues, men are more violent than women. Why do men kill, rape, and wage war, and what can we do about it? Drawing on the latest discoveries about human evolution and about our closest living relatives, the great apes, *Demonic Males* offers startling new answers to these questions. Dramatic, vivid, and sometimes shocking, but firmly grounded in meticulous scientific research, *Demonic Males* will stir controversy and debate.

—from Houghton Mifflin

"A stunning achievement. No serious discussion of human nature or male behavior can ignore the evidence in *Demonic Males*. Wrangham and Peterson trace the ancient roots of patriarchy from hominid origins through human history and across cultures. The reader will encounter species in which females are dominant and aggressive as well as a different, newly studied chimp species, the bonobo. Bonobos literally make love, not war. Might human history have taken a very different path?"

—Irven DeVore, Ruth Moore Professor of
Biological Anthropology, Harvard University
