

TRACKING DINOSAURS

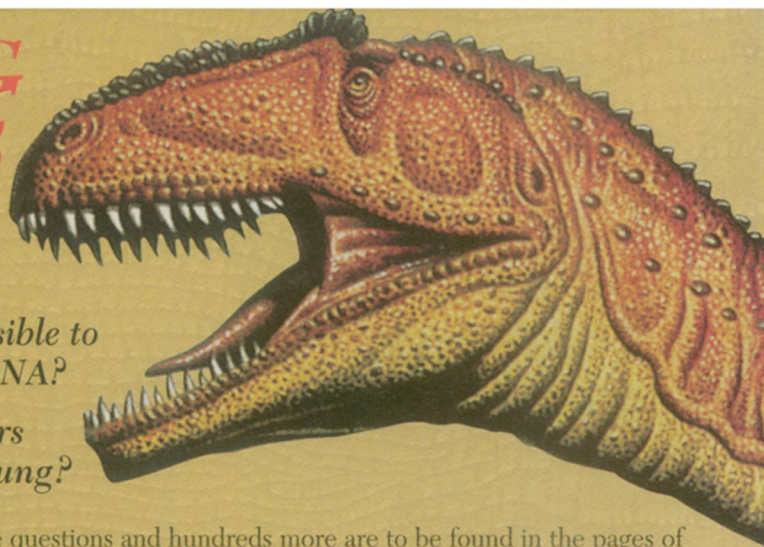

Edited by James O. Farlow and M. K. Brett-Surman
Indiana University Press, 1997
752 pages, 7 1/4" x 10 1/4", hardcover, \$59.95

What did dinosaurs eat?

Will it ever be possible to isolate dinosaur DNA?

How did dinosaurs care for their young?

The answers to these questions and hundreds more are to be found in the pages of *The Complete Dinosaur*, an exuberant celebration of dinosaurs and of our ongoing fascination with them.

This book is the single most authoritative and accessible source on dinosaur science today for the general reader. In the past decade, dinosaur paleontology has experienced an explosive growth. So rapidly has the field expanded that no individual can hope to master all its aspects. The editors have brought together 47 experts in subjects ranging from functional morphology and paleobiology to biogeography and systematics to present a thorough survey of dinosaurs from the earliest discoveries through the contemporary controversies over their extinction. Where contention exists, as over the question of whether dinosaurs were warm-blooded or cold-blooded, the editors have let the experts agree to disagree. Technical jargon is kept to a minimum, and there is a glossary of unfamiliar terms.

A sumptuously illustrated, scientifically accurate, and up-to-the-minute guide, *The Complete Dinosaur* is a feast for serious dinosaur lovers everywhere.

— from Indiana University Press

- ▲ Over 350 illustrations, including many new or rarely seen drawings and painting of dinosaurs, and 16 pages of color
- ▲ Includes the latest dinosaur discoveries
- ▲ New information on the warm-blooded/cold-blooded debate
- ▲ New insights into the possibility of isolating dinosaur DNA
- ▲ All about dinosaur birth, growth, diet, illnesses, and injuries

- ▲ Each chapter written by an expert in dinosaur studies including José F. Bonaparte, Karen Chin, Peter Dodson, Catherine A. Forster, Martin G. Lockley, John Ruben, Dale A. Russell, William A.S. Sarjeant, Paul C. Sereno, Hans-Dieter Sues, and Bruce H. Tiffney
- ▲ Covers each of the dinosaur groups, the evolution of dinosaurs, and the plants and other animals that inhabited the world of the dinosaurs
- ▲ A special chapter on dinosaurs in the media
- ▲ A time line of the history of dinosaur science
