Get Smart!

Since The Princeton Review published its first *Smart* book, the series has gone on to sell well over half a million copies. Whether you're studying for a standardized test (like SAT, GRE, or GMAT) or just want to stay sharp, these books are the *Smart* way to go.

Biology Smart

Prokaryotic what? Musculoskeletal who? Meiosis? Are you a confused biology student? Help has arrived! You hold in your hands the key to a symbiotic relationship between your brain and biology. *Biology Smart* clearly explains:

- cellular structure • general and organic chemistry • ecology
- human physiology • chromosomes, mitosis, and meiosis

1996, 238 pages, \$12.00

Grammar Smart

Grammar Smart uses a witty, irreverent approach to help you write and speak with greater clarity and confidence. *Grammar Smart* shows you the logic behind each correct sentence. You'll learn: • the basic parts of speech • noun-verb agreement • parallel construction • tips on how to avoid misplaced modifiers • how to choose between "that" and "which" and "as" and "like"

1996, 203 pages, \$11.00

Math Smart

Math Smart demonstrates how all the properties and operations of math are related. Once you've learned the basics, *Math Smart* will show you how to handle exponents, square

roots, geometry, and algebra. Easy-to-use techniques break down any complicated equation into its basic parts and eliminate the need to memorize dozens of long functions and equations.

1993, 290 pages, \$12.00

Reading Smart

Reading Smart helps people who have a hard time keeping up with assignments, understanding novels, or just reading efficiently. *Reading Smart* will help you increase your reading speed and comprehension with such techniques as prereading, pen-marking, mapping, clustering, and much more.

1992, 287 pages, \$12.00

Study Smart

Using *Study Smart's* systematic studying strategies, you'll better understand your textbooks and be able to ace any test, be it true-false, multiple choice, short answer, or essay.

1992, 287 pages, \$12.00

Writing Smart

Does your boss need a project proposal first thing in the morning? Do you have a research paper that you're having trouble starting? *Writing Smart* starts with the basics, like composing good sentences and paragraphs and editing your own work. After you've got those concepts down, you'll master project proposals, professional letters, convincing essays, solid research papers, and lab reports.

1994, 277 pages, \$12.00

Word Smart

Do you know that to *peruse* a book is not to *skim* it? Do you know the adjective form of *admonish* or the noun form of *dubious*?

If you answered no to any of these questions, you need *Word Smart*. It outlines common usage errors, words that frequently appear on standardized tests, foreign phrases, abbreviations, and terms you need to understand finance, science, computers, and the arts.

1993, 320 pages, \$12.00
