

Introducing the Bose® Wave® radio/CD.

It's the latest innovation from the most respected name in sound. Bose has never been known to rest on its laurels. While another company might settle for having invented the industry's most highly reviewed radio, regardless of size or price—we couldn't. So we challenged ourselves to repeat our success—with the Bose Wave radio/CD.

We started by maintaining the performance. It demands your attention from the first note with its lifelike sound. Deep bass moves you. Clear, crisp sound engulfs you—sound that is only possible with our patented acoustic waveguide speaker technology. It's the technology which when introduced in the original Wave radio, created the sound *Radio World* called "simply amazing...a genuine breakthrough." And won its inventors the coveted "Invention of the Year" award.

Then there's the way it functions. As a CD player for your most treasured music. As an AM/FM radio, with convenient presets. As speakers that bring the action to life with your TV or computer. Even as a clock radio with dual alarms to

wake you gently
to your favorite
CD track or sta-
tion. And let's

Wave Radio/CD
\$499

not forget the credit card-sized remote that controls even the skip and search functions from across the room.

And, as for form, the simple, elegant style of the Bose Wave radio/CD makes it right at home in virtually any décor.

We guarantee no conventional radio comes close.

The Wave radio/CD is available from Bose for \$499. Call and we'll ship yours right away—and ask about our interest-free payment plan. Plug it in and listen to your favorite CD. From that very first minute, we don't think you'll ever be able to part with it. If you can, return it within 30 days and we'll refund your entire purchase price. But once you hear the latest innovation from Bose, we suspect you won't be happy with anything less.
