

## This Week

- 340 Grade Meat Tender, Grade Meat True . . .  
*Janet Raloff*
- 340 Algae need not be the fittest to survive  
*Oliver Baker*
- 341 New supernova goes the cosmic distance  
*Ron Cowen*
- 341 Hubble goes temporarily blind  
*Ron Cowen*
- 342 The give and take of Parkinson's treatment  
*Nathan Seppa*
- 342 Physics rule of thumb gets thumbs down  
*Peter Weiss*
- 343 Monarch butterflies use magnetic compasses  
*Susan Milius*
- 343 Genes reveal recent origin for the plague  
*John Travis*

## Articles

- 344 Schrodinger's Cash Register  
Physicists try to break economists' monopoly on financial theory  
*Oliver Baker*
- 348 Heading for Injury?  
The danger of heading soccer balls remains up in the air  
*Damaris Christensen*

## Research Notes

- 347 Biomedicine  
Aneurysms frequent in cocaine users  
Arterial disease appears in young hearts  
Sterol margarine cuts bad cholesterol  
Gene variant linked to heart risk
- 351 Computers  
Pondering the fate of copyright  
Scenarios for Y2K new year
- 351 Earth Science  
Plumbing Antarctica for climate clues  
Storm damage soars in La Niña years

## Departments

- 338 Books
- 339 Letters

**Cover:** Increasing numbers of children are playing soccer, which is considered a relatively safe form of much-needed vigorous exercise. Yet several small studies in adults suggest that playing soccer may cause subtle mental deficits. Are these problems due to accidental injuries sustained during play or to intentional heading of the ball?

## Editor's Letter

Want to hear **SCIENCE NEWS** while you're driving your car? Or when you're raking the leaves? Or eating breakfast? **SCIENCE NEWS** stories are now available in a digital audio format from Audible.com (<http://www.audible.com/sciencenews>). Audible.com offers spoken audio for playback on personal computers and special mobile devices.

Beginning this week, we will provide the text of many of our stories to Audible, where public-radio host and producer Mark Moran will record a spoken version. You can order individual issues of **AUDIBLE SCIENCE NEWS** for \$1.95, or you can subscribe to **AUDIBLE SCIENCE NEWS** for \$15.95 per year, and issues will be automatically delivered to your computer.

You can listen to **AUDIBLE SCIENCE NEWS** at your computer or download the content onto a mobile device, such as an Audible MobilePlayer (available from Audible's Web site) or a palm-size PC, and play the stories

through earphones, speakers, or a car stereo.

At <http://www.audible.com/sciencenews>, you can sample, purchase, subscribe to, and download more than 18,000 hours of audio content in addition to the weekly installment of **AUDIBLE SCIENCE NEWS**, which will be available each Monday.

**SCIENCE NEWS** is the first science magazine that Audible has selected to offer. Other available science-related recordings include NPR's "Talk of the Nation Science Friday" and audiobooks by Stephen Jay Gould, Richard Feynman, Daniel J. Boorstin, and Rachel Carson.

We at **SCIENCE NEWS** hope to reach out to a broader audience with this new offering and to make our stories more accessible to the magazine's current readers. So, you may want to give your eyes a break and listen to **AUDIBLE SCIENCE NEWS**, the weekly audio newsmagazine of science.

—Julie Ann Miller

## Vintage science photos online

Since 1926, each issue of **SCIENCE NEWS** has featured photographs highlighting scientific and technological advances. An annotated, indexed selection of these historic images, from an archive at the Smithsonian Institution in Washington, D.C., is now available on the Web. Browse the image collection, which

focuses on electricity and physics, at <http://americanhistory.si.edu/sciencesevice> and check out the electric lamp George Westinghouse used to light the 1893 World's Fair, a smorgasbord of early "radio vision" receivers, and a maze of copper coils being assembled into a turbine generator. The site also provides the photos' original captions.
