SCIENCE NEWS

the parts of blood
letter from Geneva

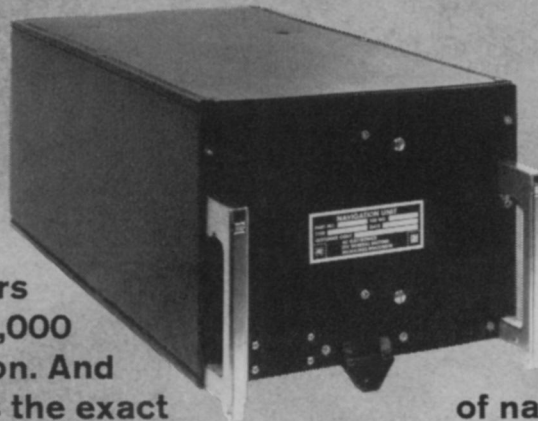

Marshall: Von Braun's Department

Tame the wild blue yonder

A jet takes off from New York with more than 300 passengers aboard. Flies over 3,000 miles. Lands in London. And the pilot always knows the exact position of the plane without asking a navigator. It will happen in the next couple years. When The Boeing Company introduces its 747 super-jet that's equipped with our new inertial navigation system—the Carousel IV. The system always knows where the plane is and the best way to its destination. It can feed steering commands directly

General Motors

to the auto-pilot, or tell the pilot what heading to follow. The Carousel IV also tells the pilot a world of navigational information — his position, ground speed, direction heading, pitch and roll attitude, wind direction and speed, and distance and time to go to his destination. From a little black box that weighs some 50 pounds. Built by our AC Electronics Division. The wild blue yonder will never be the same.

Fisher Body • Frigidaire • GMC Truck & Coach
• Detroit Diesel • United Delco • AC Spark Plug
Euclid • Allison • Electro-Motive

NOTE: This advertising is being sponsored by General Motors in several youth publications. It is hoped that the subjects featured will serve to increase teen-ager interest in scientific studies and can be used, perhaps, to show how the things your students are learning are utilized in actual industrial activities. Reprints of this ad are available upon request. Simply write to General Motors, Advertising & Merchandising Section, General Motors Building, Detroit, Michigan 48202.

OF THE WEEK

- 351 Actinide series of elements proved by experiment
- 352 Making children scientifically literate
- 353 Health bureaucracy shifts; researchers unaffected
- 354 The double helix roils the chemists
F-111 downed in Thailand and Washington
- 355 **Medical Sciences Notes:** Industrial workers exposed to lasers; Human parts to be readied; Study shows risk in hormone therapy; Mexico takes vaccine to hinterland; Three heart valves from pig; Fish meal reduces dental harm by sugar
- 356 **Aerospace Notes:** Lights signal runway runout; Radio range upped for 747; Visibility from aircraft studied; Space arm resists twisting; Making room for the giant jets; Refrigerator cools satellite sensors
- 357 **Technology Notes:** Molten salt reactor to use U-233; Ford developing steam possibilities; Cheap low-temperature method of desalting; Microwave energy dries print; Promethium used for heater, battery; Hover-train with silent motor
- 358 **Physical Sciences Notes:** Total lunar eclipse on April 12; Standards for atmospheric gases; Electroluminescent gallium arsenide; Molecular beams on the moon; Ancient three-body problem solved

FROM ABROAD

- 360 **Australia:** Murder bonus paid on wombats
- 364 **India:** Nudging the space leaders
- England:** Plastic foredecks for submarines
- Geneva:** EMBO selects its targets
- 366 **Letter from Geneva:** A plethora of 45-Bev problems

IN SCIENCE FIELDS

- 359 **Hematology:** Taking the blood apart
- 362 **Space:** Marshall Center, the house that space built

DEPARTMENTS

- 367 Books of the week
- 350 Films of the week
- 365 Ideas of the week
- 350 Letters to the Editor
- 348 Patents

COVER

America's Rocketland is the Marshall Space Flight Center, a Space Age outpost in the out-back of northern Alabama. With NASA's leading light, Dr. Wernher Von Braun at the controls, Marshall influences the fortunes of an entire area. p. 362. (Photo: NASA)

SCIENCE SERVICE

Institution for the Popularization of Science founded 1921; a non-profit corporation

Board of Trustees—Nominated by the American Association for the Advancement of Science: **Athelstan F. Spiihaus**, Franklin Institute; **Wallace R. Brode** (Treasurer), Washington, D. C.; **Bowen C. Dees**, University of Arizona. Nominated by the National Academy of Sciences: **Henry Allen Moe**, The Clark Foundation; **Harlow Shapley**, Harvard College Observatory; **Allen V. Astin**, National Bureau of Standards. Nominated by the National Research Council: **Glenn T. Seaborg** (President), U.S. Atomic Energy Commission; **Leonard Carmichael**, National Geographic Society; **John R. Whinnery**, University of California, Berkeley. Nominated by the Journalistic Profession: **O. W. Riegel** (Secretary), Washington and Lee University; **Gordon B. Fister**, Call-Chronicle Newspapers; **Eugene Patterson**, Atlanta Constitution. Nominated by the Scripps Estate: **John Troan**, Pittsburgh Press; **Ludwell Denny**, Scripps-Howard Newspapers; **Edward W. Scripps II** (Vice President), Edward W. Scripps Trust.

Director: E. G. Sherburne Jr.; **Assistant Director:** Dorothy Schriver; **Staff:** Science Youth Division: Howard Weisbrod. **Photography:** Fremont Davis. **Syndicate Sales:** Forrest L. Snakenberg.
