science and the election

Return of the steam car

It's air. The only lubricant needed for Airstar—the new air bearing developed by General Motors to allow parts to move smoothly in places where conventional bearings aren't practical.

For example, the textile industry. Airstar bearings don't need oil, so there's no chance for the fabric to get soiled from dripping lubricants.

Air bearings work even when temperatures rise as high as 2000°F, making them ideal for ovens, furnaces, and hot metal pumps.

And since they can rotate at very high speeds, they're perfect for centrifuges, machine tool spindles, and dental drills.

Airstar bearings even work under water.

The idea for air bearings has been around for a while, but it took the people at General Motors Research Laboratories and GM's New Departure-Hyatt Bearings Division to make the idea practical.

General Motors

**Take a deep breath
and sample our new
bearing lubricant.**

SCIENCE SERVICE

Institution for the Popularization of Science founded 1921; a non-profit corporation

Board of Trustees—Nominated by the American Association for the Advancement of Science: **Athelstan F. Spilhaus**, West Palm Beach, Fla.; **Wallace R. Brode** (Treasurer), American Chemical Society, Washington, D. C.; **Bowen C. Dees**, University of Arizona. Nominated by the National Academy of Sciences: **Henry Allen Moe**, The Clark Foundation; **Harlow Shapley**, Cambridge, Mass.; **Allen V. Astin**, Bethesda, Md. Nominated by the National Research Council: **Glenn T. Seaborg** (President), U.S. Atomic Energy Commission; **Leonard Carmichael**, National Geographic Society; **John R. Whinnery**, University of California, Berkeley. Nominated by the Journalistic Profession: **O. W. Riegel** (Secretary), Washington and Lee University; **Gordon B. Fister**, Call-Chronicle Newspapers; **Peter Clark**, Evening News Association, Detroit. Nominated by the Edward W. Scripps Trust; **John Troan**, Pittsburgh Press; **Ludwell Denny**, Monterey, Calif.; **Edward W. Scripps II** (Vice President), Edward W. Scripps Trust.

Director: E. G. Sherburne Jr.; Assistant Director: Dorothy Schriver; Staff: Youth Division, Howard Weisbrod; Things of Science, Ruby Yoshioka.

Newspaper Services: Editor, Warren Kornberg; Managing Editor, Frank Sartwell.

A Science News reporter has two points of view.

Science News reporters are both scientific specialists . . . and experienced, exacting journalists.

From coast to coast and around the world they seek out up-to-the-minute, hard-fact news of current scientific happenings . . . and send it back to our Washington-based staff for expert editing. Our perceptive professionals contribute realistic evaluations and interpretations of occurrences in virtually every scientific and technical field . . . in-depth stories that provide the perspective . . . features and columns that emphasize what's new and significant in research, development, exploration and discovery. In addition, they supply us with pertinent photographs, diagrams, drawings, maps and other illustrative material.

You enjoy their two points of view.

Why not send a gift subscription to somebody else who will enjoy Science News as much as you do?

Simply fill out the coupon below and mail it to us. We'll take care of the rest.

- ...that you have a blind spot?
- ...where and what your third eye is?

Discover thousands of fascinating facts about

THE BODY

a volume from the

LIFE

SCIENCE LIBRARY

(please turn page)

The most fantastic, efficient machine

THE BODY

Explore its marvels and mysteries
as a guest of the

LIFE SCIENCE LIBRARY

While we marvel at our giant data processing machines, we tend to forget the incredible powers of the human machine which created them...the body. Consider your own brain. It weighs about three pounds, yet a computer big enough to process its daily activities would have to be the size of the Empire State Building. Or consider your fist-sized heart. It pumps 5,500 quarts of blood through 60,000 miles of "tubing" every day. Our bodies are made up of machines within machines. Each of your cells is so tiny that it takes millions of them to form a half inch cube of your body tissue. Yet every one of these cells is an almost unimaginably busy chemical laboratory.

Recent scientific breakthroughs in probing the body's secrets are spectacular and give rise to widespread curiosity on the entire subject. People want to know what a "slipped disc" really is...why babies are born with a "soft spot" in their skulls...how artificial kidneys actually work...what the problems are in transplanting living organs—eyes, for example...the causes of arteriosclerosis...all about "dry surgery" and the machine that makes it possible. Therefore, the Editors of TIME-LIFE BOOKS have brought together all these findings—and more—in THE BODY, introductory volume of the LIFE Science Library. You and your youngsters, through a brilliant text and photo-essay technique, will be fascinated by this colorful volume.

You are invited to examine a copy of THE BODY for 10 days absolutely free. Do so and you'll discover what makes our bones able to withstand 20,000 pounds of pressure per square inch. You'll learn why modern architects study human anatomy to improve the skeletal structure of skyscrapers. You'll explore the workings of our sense organs and see why scientists call them "the network that never sleeps." You'll come to understand the function of the endocrine glands. (It's the adrenalin pumped into his veins that makes an angry man see red.)

Because of vast facilities and large print orders, TIME-LIFE BOOKS is able to offer you

THE BODY at a price far below what you would normally pay for a book of this size, scope and quality—only \$3.95 plus a small shipping charge—and an opportunity to examine it before you decide to buy.

THE BODY consists of 200 pages with 35,000 words of text. More than half of the 160 illustrations are in full color. There's a unique tabulation of human variables, a life span world map, a sex differences guide, and a 9-page board game which makes learning physical processes fun.

SEND NO MONEY

It will cost you nothing to examine THE BODY for ten days as the guest of TIME-LIFE BOOKS. If not delighted, return it and owe nothing. But should you feel that you want to own this handsome book and that it will enhance the value of your home library, simply keep it and pay only \$3.95 plus shipping.

In that case you will have the privilege of previewing future volumes in the LIFE Science Library, sent at two-month intervals and at the same low price. The same 10-day free examination trial applies to all volumes. You may reject or retain each as you see fit. You may cancel this arrangement at any time simply by notifying us.

So do fill out and mail the postpaid order form today. The subject is **your** body. You'll find it fascinating.

machine ever created

Time & Life Building
Chicago, Illinois 60611

Please enroll me as a subscriber to the LIFE SCIENCE LIBRARY and send me Volume I (*The Body*) for a ten-day free examination. If, at the end of that time, I decide not to continue the series, I will return the book, canceling my subscription. If I keep the book, I will pay \$3.95 (plus shipping). I understand that future volumes will be issued on approval at two-month intervals, at the same price of \$3.95. The 10-day Free Examination privilege applies to all volumes in the LIBRARY, and I may cancel my subscription at any time.
