Math "Bug" You? —No Problem!

From Simple Numbers to Calculus

Now comes a new and completely different kind of self-teaching math "course"—one that yields truly amazing results!

"The author assumes no previous acquaintance with mathematics . . . He advances the reader to some mathematical notions of 'college' level . . . The near-miracle is accomplished by patient, carefully-phrased exposition and by building the discussion step-by-step . . . The book is intended for study without the aid of a teacher"—**New Technical Books** (of the New York Public Library).

If you have despaired of ever "licking" mathematics, if lack of mathematical knowhow is holding you back, if you have tried other methods and found they simply did nothing for you, then perhaps you would wish to try the remarkable Colerus method. It is **guaranteed** to satisfy your expectations, or full purchase price refunded. Not a tutored math course that stands you anywhere from \$150 to \$300, but a self-instruction manual that costs a mere \$4.95—**if you decide to keep it.**

original oils!

FAMOUS ARTIST SHOWS HOW!

If you would like to paint but have never done anything about it—this book is for you. If you have been scared off because you didn't know the "rules"—this book is certainly for you.

LET RULES COME LATER! Guy Williams, the famous teacher who is also a highly successful artist, says the **FUN OF PAINTING** should start right away. That's why he starts you in painting—and enjoying it!—the very first day. Don't worry about rules! Great artists break them every day! Of course you'll learn them later from the book. But right now, Williams insists you take up oils, watercolors, pastels, charcoal, crayon, ink, or pencil—and see how easily human figures, still-life compositions, and natural scenes take shape on your paper or canvas.

YOU'LL BE AMAZED how quickly the techniques of painting come to you with the help of Guy Williams' experienced guidance. It's almost like working in his studio, feeling his hand on your shoulder as he explains how to handle perspective . . . how to show dimension, light and shadow . . . how to use line and color to portray moods of sadness, joy, speed, languor, youth, age, day, night, etc.

For Fun & Profit

The most upper-class of current pastimes, here and in Britain, is testing gem stones. This exciting pursuit combines the challenge of detective work . . . the thrill of spotting sensational "buys" . . . the satisfaction of knowing when someone else's big flashy "diamond" isn't . . . and the opportunity for highly paid sparetime earnings.

Bible of amateurs and professionals alike is **GEM TESTING**, a remarkably simple, lavishly illustrated book by B. W. Anderson. As director of London's world-famed Precious Stone Laboratory, Anderson has examined more gems than any other man in history.

Now he shows you step-by-step the high speed methods by which he unerringly identifies precious stones. Emphasis throughout the book is on rapid examination with the naked eye. Contents include:

- how to pick up bargains in valuable stones which appear worthless because they are dirty or poorly set
- 6 simple tests for diamonds, rubies, emeralds, jade, turquoise and other gemstones
- how to spot imitations and synthetics even when they are clever enough to fool a jeweler
- how to assemble a low-cost collection of gem specimens for comparison purposes
- judging gems by color; what to watch for
- how to select simple equipment to speed your analyses
- how to test a jeweler's scale—self-protection when you buy or sell precious stones or metals by weight
- how to distinguish real, cultured and imitation pearls
- how to select superb semiprecious stones which provide finer effect than precious stones of average quality.

THIS FIRST AMERICAN EDITION of **GEM TESTING** tells, shows, and explains everything you need to start right in testing . . . and go on, if you wish, to become an expert fully qualified to handle lucrative work for jewelers and private collectors.

Fully illustrated with photographs, drawings, and in color.
